Shift Neela Bettridge, Philip Whiteley, 2016-04-29 Our traditional ways of looking at economics business and politics are not fit for purpose The causes of the recent crisis were behavioural and international but our measures are superficial and financial recorded at a national or company level This is combined with a fervent quest for endless growth no matter how unsustainable Theory has to catch up with reality Many books chart different courses for economic and business management but New Normal Radical Shift is different Using examples from international organizations around the world it analyses not only the business model that failed but challenges wider economic and political beliefs that employees interests always conflict with those of managers and business owners Neela Bettridge and Philip Whiteley argue that the right messages about good practice in business struggle to be heard not because of indifference or inertia but because dysfunctional philosophies are still supported not only within business and business schools but also within political circles and by trade unions NGOs and others campaigning for workers rights The central belief of the old normal is that profits are made by exploiting workers and the environment In this book the authors arguments all supported by exemplary case studies demonstrate that this belief is false opening up enormous possibilities in a new normal of enhanced working lives environmental protection and business success Banking and Microfinance Institution Partnerships Don Chandima

Darroch, 2017-10-31 Winner of the 2018 Donner Prize for the Best Public Policy Book by Canadian authors Stumbling Giants by Patricia Meredith and James L Darroch presents a compelling new vision of the Canadian banking industry in which stakeholders work together to propel the country's banking system into the twenty first century Canada's big six banks survived the 2008 financial crisis by adhering to traditional banking practices which made them a safe harbour amidst the turmoil With banks earning 40 per cent return on equity from practices such as in person retail banking pressure from investors with short term interests continues to discourage technological innovation and adaptation However today's global information economy has transformed the financial lives of individuals and companies alike Meredith and Darroch argue that Canadian banks refuse to address the disruptive info tech changes that ultimately threaten their very existence The authors also set forth a cohesive set of recommendations to prepare the nation's banks for the challenges and opportunities offered by the digital age This call to action for the Canadian banking will resonate with financial sector managers policy makers and above all general readers
