What Are The Major Economic Activity In Mtapá State:

The Zimbabwe Culture Innocent Pikirayi, Joseph O. Vogel, 2002-07-15 Offering a unique and original perspective on the rise and fall of indigenous states of southern Zambezia The Zimbabwe Culture analyzes the long contentious history of the remains of the remarkable cyclopean masonry ranging from mighty capitals of traditional kings to humble farmsteads Forming a cornerstone of the geographical lore of Africa in the seventeenth and eighteenth centuries debate on the origins development and collapse of the Zimbabwe culture has never ceased and with increasing archaeological research over the twentieth century has become more complex Thoroughly examining the growth and decline of pre colonial states on the entire Zimbabwean Plateau and southern Zambezia Dr Pikirayi has contributed tremendously towards the archaeological understanding of this extraordinary culture The Zimbabwe Culture is essential reading for all students and avocationalists of African archaeology history and culture

African Kingdoms Linda Hill, AI, 2025-03-19 African Kingdoms challenges conventional often Eurocentric views by exploring the sophisticated political economic and military systems of pre colonial African societies Delving into major kingdoms like Great Zimbabwe and the Ashanti Empire the book reveals how these societies were active agents in shaping their own destinies and influencing global events It highlights that many of these kingdoms possessed complex governance structures and extensive trade networks demonstrating their significant contributions to global civilization often overlooked in traditional histories This exploration unfolds chapter by chapter beginning with an introduction that sets the stage by addressing common misconceptions Subsequent chapters provide case studies analyzing each kingdom s political structure economic systems and military organization The book s research relies on diverse sources including archaeological evidence oral traditions and primary accounts ensuring a balanced portrayal By prioritizing African voices African Kingdoms offers a unique and more accurate perspective on pre colonial African history The book culminates by synthesizing its findings to assess the overall impact of African kingdoms on regional and global history It emphasizes their contributions to trade diplomacy and cultural exchange promoting a more nuanced understanding of the African past and its relevance to global history This approach provides valuable insights into alternative models of governance and development challenging stereotypes and fostering a deeper appreciation of African heritage

A History of Zimbabwe, 1890-2000 and Postscript, Zimbabwe, 2001-2008 Chengetai J. M. Zvobgo, 2009-10-02 This study combines in one volume the history of Zimbabwe from the advent of British settlers in 1890 to 2000 including women s rights and human rights in Zimbabwe It is a political social and

economic history The Postscript examines the major developments in Zimbabwe from 2001 to 2008 The two previous major studies on the history of Zimbabwe The Past Is Another Country by Martin Meredith London Andre Deutsch 1979 and The Road to Zimbabwe 1890 1980 by Anthony Verrier London Jonathan Cape 1986 are now out of date This volume brings the historical study of Zimbabwe almost up to the present day *The Archaeological Identity of the Mutapa State* Innocent Pikirayi,1993

Gender, Politics and Land Use in Zimbabwe 1980ñ2012 Mafa, Onias,Gudhlanga, Enna S.,2015-10-19 The agrarian reform dynamics in southern Africa have to be understood within the framework of colonial land policies and legislation that were designed essentially to expropriate land and natural resource property rights from the indigenous people in favour of the white settlers Colonial land policies institutionalised racial inequity with regard to land although conditions are not homogeneous there are broad themes that cut across the southern Africa region Colonialism dispossessed and impoverished the people by taking away the most productive lands Neoliberal globalization has undermined the people s well being through direct influences on agriculture and rural economies in conjunction with policies promoted by national governments and international agencies Another shared feature is to be found in the high rates of unemployment poor returns to small scale agriculture lack of access to social services such as health and education all of which serve to erode existing livelihood activities and perpetuate relative and absolute poverty in rural areas This comparative study on Zimbabwe s agrarian reforms may provide countries such as South Africa and Namibia with valuable lessons as they attempt their own land reforms Conflicts between colonialists and the indigenous people in the then Rhodesia centred mainly on the land question This inequitable distribution of land resulted in Africans waging liberation struggles in order to reclaim their land from the colonialists In most post colonial countries calls have been made for land redistribution as a way of redressing colonial injustices in land tenure systems The process of reclamation of land and redistributing it to the indigenous people is fraught with problems and has resulted in the present day land crisis in many parts of Africa and other continents These are some of the issues this book examines attempts to understand and explain from a gender perspective Gender relations are viewed in terms of land use and ownership in pre colonial colonial and post colonial Zimbabwe These socially constructed roles have been found to be unequal in terms of power and decision making It is argued that lessening of social inequalities between men and women reduces poverty raises farm efficiency and improves natural resource management The book emphasizes that once women are empowered the quality of life of their households improves **Crafting Identity in**

Zimbabwe and Mozambique Elizabeth MacGonagle,2007 Crosses conventional theoretical temporal and geographical boundaries to show how the Ndaus of southeast Africa actively shaped their own identity over a four hundred year period

People Making History Peter S. Garlake,Andre Proctor,T. Barnes,1985 Two titles complete the four part series of African history told by Africans from an African perspective Recommended for schools in Zimbabwe the series represents a reclaiming of history from the distortions of Eurocentric teaching Book 3 covers pre capitalist modes of production in Africa

early merchant capitalism in Africa growth of industrial capitalism in Europe revolution and socialist transformation and capitalism in crisis Readers are encouraged to think critically and read the source material included In addition to giving attention to the great people in history the book focuses attention on the ordinary men and women peasant farmers workers mothers and children The people's voice is heard through direct quotations Book 4 covers colonialism and resistance Zimbabwe under colonial rule revolution and transformation and world anti-imperialist struggles The Archaeology of Africa Bassey Andah, Alex Okpoko, Thurstan Shaw, Paul Sinclair, 2014-05-22 Africa has a vibrant past It emerges from this book as the proud possessor of a vast and highly complicated interweaving of peoples and cultures practising an enormous diversity of economic and social strategies in an extraordinary range of environmental situations At long last the archaeology of Africa has revealed enough of Africa's unwritten past to confound preconceptions about this continent and to upset the picture inferred from historic written records Without an understanding of its past complexities it is impossible to grasp Africa's present let alone its future *The African Heritage* Misheck Sibanda, 1999 **Farmers, Kings, and Traders** Martin Hall, 1990-10-15 In this overview of the origins and development of black societies in southern Africa Martin Hall reconstructs the region's past by thoroughly examining both the archaeological and the historical records Beginning with the gradual southward movement of the earliest farmers nearly two thousand years ago Hall tracks the emergence of precolonial states such as Mapungubwe and Great Zimbabwe *Farmers Kings and Traders* concludes with the devastating effects of colonialism Through a close reading of the accounts of early travelers colonialists archaeologists and historians Hall places in context the often contradictory histories that have been written of this region The result is an illuminating look at how ideas about the past have themselves changed over time Cities in the World: 1500-2000: v. 3 Adrian Green, 2018-12-13 Papers presented at the Cities in the World conference held at Southampton University and organised through the Society for Post Medieval Archaeology challenged the commonly held perception that cities are about the present and the future not about the past All cities have an innate sense of the past and this volume encompassing as it does How Europe Underdeveloped Africa Walter Rodney, 2018-10-23 *How Europe Underdeveloped Africa* is an ambitious masterwork of political economy detailing the impact of slavery and colonialism on the history of international capitalism In this classic book Rodney makes the unflinching case that African maldevelopment is not a natural feature of geography but a direct product of imperial extraction from the continent a practice that continues up into the present Meticulously researched *How Europe Underdeveloped Africa* remains an unshakably relevant study of the so-called great divergence between Africa and Europe just as it remains a prescient resource for grasping the multiplication of global inequality today In this new edition Angela Davis offers a striking foreword to the book exploring its lasting contributions to a revolutionary and feminist practice of anti-imperialism **Natural Resource Sovereignty and the Right to Development in Africa** Carol Chi Ngang, Serges Djouyou Kamga, 2021-08-25 This book explores the nexus between natural resources ownership and the right to development in Africa

The right to sovereignty over natural resources and the right to development are recognised and protected in an extensive framework of international regional and domestic instruments They guarantee people s entitlement to fully and freely utilise their natural resources as a means of subsistence and for economic social and cultural development Yet despite the abundance of natural resources in Africa a majority of the people on the continent remain largely impoverished This book articulates the central argument that to achieve the right to development in Africa requires appropriate governance of the continent s natural resources to which the people of Africa are guaranteed sovereign ownership With case study illustrations from Zimbabwe Ghana Ethiopia and the Democratic Republic of Congo chapters explore the normative measures specific guarantees and community entitlements to natural resources for the realisation of the right to development The book will be an invaluable guide to scholars and postgraduate students of Natural Resources Development and African studies as well as policymakers and practitioners in these areas

Great Zimbabwe Shadreck Chirikure,2020-11-29 Conditioned by local ways of knowing and doing Great Zimbabwe develops a new interpretation of the famous World Heritage site of Great Zimbabwe It combines archaeological knowledge including recent material from the author s excavations with native concepts and philosophies Working from a large data set has made it possible for the first time to develop an archaeology of Great Zimbabwe that is informed by finds and observations from the entire site and wider landscape In so doing the book strongly contributes towards decolonising African and world archaeology Written in an accessible manner the book is aimed at undergraduate students graduate students and practicing archaeologists both in Africa and across the globe The book will also make contributions to the broader field such as African Studies African History and World Archaeology through its emphasis on developing synergies between local ways of knowing and the archaeology

General History of Africa International Scientific Committee for the drafting of a General History of Africa,1984-12-31 One of UNESCO s most important publishing projects in the last thirty years the General History of Africa marks a major breakthrough in the recognition of Africa s cultural heritage Offering an internal perspective of Africa the eight volume work provides a comprehensive approach to the history of ideas civilizations societies and institutions of African history The volumes also discuss historical relationships among Africans as well as multilateral interactions with other cultures and continents

Grid-locked African Economic Sovereignty Victor Warikandwa,Artwell Nhemachena,2019-02-06 The emergent so called Fourth Industrial Revolution is regarded by some as a panacea for bringing about development to Africans This book dismisses this flawed reasoning Surfacing how investors are actually looting and plundering Africa how the industrial internet of things the gig economies digital economies and cryptocurrencies breach African political and economic sovereignty the book pioneers what can be called anticipatory economics which anticipate the future of economies It is argued that the future of Africans does not necessarily require degrowth postgrowth postdevelopment postcapitalism or sharing solidarity economies it requires attention to age old questions about African ownership and control of their resources

Investors have to invest in ensuring that Africans own and control their resources Further it is pointed out that the historical imperial structural creation of forced labour is increasingly morphing into what we call the structural creation of forced leisure which is no less lethal for Africans Because both the structural creation of forced labour and the structural creation of forced leisure are undergirded by transnational neo imperial plunder theft robbery looting and dispossession of Africans this book goes beyond the simplistic arguments that Euro America developed due to the industrial revolutions *Port Cities and Intruders* Michael N. Pearson,2002-10-14 Selected by Choice Magazine as an Outstanding Academic Title In *Port Cities and Intruders* historian Michael Pearson explores the role of port cities and their orientation relations between the coast and the interior the place of the coast in the world economy and the impact of the Portuguese in the early modern period

Landscape Transformations and the Archaeology of Impact Warren R. Perry,2005-11-25 An attempt to use archaeological materials to investigate the colonization of southeastern Africa during the period 1500 to 1900 Perry demonstrates the usefulness of archaeology in bypassing the biases of the ethnohistorical and documentary record and generating a more comprehensive understanding of history Special attention is paid to the period of state formation in Swaziland and a critique of the Settler Model which the author finds to be invalid **Understanding Cultural Landscape at Great Zimbabwe** Ashton Sinamai,2024-12-16 *Understanding Cultural Landscape at Great Zimbabwe* Realms of Power by Ashton Sinamai engages with archaeology through Karanga Kalanga concepts of cosmology and philosophy to understand the landscape at Great Zimbabwe the medieval city and cultural heritage site Sinamai un disciplines and decolonializes archaeology and highlights aspects of the landscape that have been impacted by colonial legislations nationalization and internationalization This book provides new perspectives on the landscape and it addresses debates among African and Western archaeologists in reforming the practice interpretation and construction of archaeological narratives in Africa Sinamai debunks Western myths by exploring African heritage through diverse knowledge systems to illuminate our understanding of place Each chapter unfurls a variety of facets within Great Zimbabwe discovering what a place can mean how it shapes culture and what emotions and memories can be evoked through local narratives This book goes beyond human memory and shows how the landscape also remembers African knowledge systems are essential to the development and understanding of African archaeology and African heritage management systems
