How Workaholism Causes Americans to Disregard Their Health

Welcome to America! Here lies a society that has undergone a drastic change in priorities. Wealth has become more valuable than health, productivity has begun to override rest and occupational responsibilities are being prioritized over family duties. American society has begun to normalize lengthening the weekday work schedule and working on the weekends. In the 2006 article "Worry-free Weekends a Thing of the Past", Ellen Wulffhorst highlights responses from workers in the finance industry after the global financial crisis. The interviewees contrast how they once structured their weekends prior to the crisis versus how they structured their weekends after (Wulffhorst). Wall Street worker Michael Pento talks about how he no longer spends his weekends with his four year old son and Brian Gendreau, a strategist at ING Investment Management, states that he has had to drop many of his hobbies and decrease the time he spends with his family in order to work more (Wulffhorst). The pattern of prioritizing work over other life matters can be harmful and is likely fueled by consumerism. The culture of consumerism in America has led Americans to drastically increase their work hours which has caused them to sacrifice their physical health, relational health and pursuit of meaning.

In James Truslow Adams' 1931 book *The Epic of America*, he defines the American dream and criticizes American societies' rising commitment to consumerism and industrialization. Adams argues that as Americans begin to value materialism and devote themselves to work and consumption, the country would enter a state of slow destruction.
