*Assessing Academic Literacy in a Multilingual Society* Albert Weideman, John Read, Theo du Plessis, 2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

*Hunger and Poverty in South Africa* Jacqueline Hanoman, 2017-09-01 *Hunger and Poverty in South Africa: The Hidden Faces of Food Insecurity* explores food insecurity as an issue of socioeconomic, political, cultural, and environmental inequity and inequality. Based on extensive original research in Free State Province, South Africa, the book explores how people living in poverty make meaning of their food circumstances within the socio-cultural, political, and economic contexts of post-apartheid South Africa: how they view the government's food security policies and programs and their perceived agency to affect change. The personal narratives contained in the book show that food insecurity is shaped by many issues among which are structural poverty, racism, attempts or non-attempts at reconciliation during and after apartheid, public health issues such as HIV/AIDS, and environmental circumstances. At a time when most discourse around food insecurity focuses on how to provide more food to people facing hunger, this book's multidimensional approach is a valuable contribution to the contemporary dialogue on poverty, food security, insecurity, sustainability, and democratic agency both within South Africa and around the world. This book will be of interest to researchers in the areas of food security, multidimensional poverty, democratic agency, and sustainable development both in South Africa and internationally.
