This volume brings together works on the development of scientific and technical knowledge in Europe between the 13th and 16th centuries with a special focus on the Iberian Peninsula These works which rely heavily on the evidence provided by the written record pay particular attention to the content of recipe books and technical treatises from the 15th and 16th centuries The volume addresses issues such as manuscript and technical recipe book analysis archaeological investigation of production areas and archaeometric analysis presenting a holistic and comprehensive perspective of technical knowledge during the Middle Ages It highlights different approaches and perspectives in the analysis of medieval technical and technological knowledge in order to arrive at equally broad and complementary conclusions     *Real Soldiering* Brian McAllister Linn,2023-06-23 What happens to the US Army after the battles are over the citizen soldiers depart and all that remains is the Regular Army In this pathbreaking work Brian Linn argues that in each decade following every major conflict since the War of 1812 the postwar army has undergone a long painful and remarkably consistent recovery process as it struggled to build a new model force to replace the Old Army that entered the conflict Departing from the Washington centric institutional histories of the past Linn sets his focus on soldiering in the field distilling the lived experiences of officers and troopers who were responsible for cleaning up the messes left in the wake of war Real Soldiering provides the first comprehensive study of the US Army s transition from war to peace It is both a wide ranging history of the army s postwar experience and a work detailing the commonalities of American soldiering over almost two centuries Linn challenges three common historical interpretations confusing Washington policy with implementation in the field conflating postwar armies with prewar armies and describing certain postwar eras as distinct and transformational Rather Linn examines the postwar force as a distinct entity worthy of study as a unique and important part of US Army history He identifies the

common dilemmas faced by the service in the aftermath of every war These problems included such military priorities as defense legislation preparing for the next war and adapting to new missions But they also incorporated often overlooked but for those who lived through them more important consistencies such as officer acquisition and career management personnel turbulence insufficient personnel and equipment and many others Real Soldiering represents over four decades of research into the US Army and is deeply informed by Linn s experiences teaching and working with soldiers It breaks new ground in lifting out the similarities of each postwar army while still appreciating their individual complexities It identifies the leaders and the methods the service employed to escape the inevitable postwar drawdowns Insightful and entertaining provocative and empathetic and a work of history with immediate relevance Real Soldiering will resonate with military historians defense analysts and those who have proudly worn the US Army uniform **Newsletter** ,1990 **Current Catalog** National Library of Medicine (U.S.),1993 First multi year cumulation covers six years 1965 70 Performance-Based Specifications and Control of Concrete Durability Hans Beushausen,Luis Fernandez Luco,2015-09-24 This work gives an overview of significant research from recent years concerning performance based design and quality control for concrete durability and its implementation In engineering practice performance approaches are often still used in combination with prescriptive requirements This is largely because for most durability test methods sufficient practical experience still has to be gained before engineers and owners are prepared to fully rely on them This book compiled by RILEM TC 230 PSC is intended to assist efforts to successfully build the foundation for the full implementation of performance based approaches through the exchange of relevant knowledge and experience between researchers and practitioners worldwide *The British National Bibliography* Arthur James Wells,2005
