The Market Makers Peter Scott,2017-09-15 During the twentieth century affluence both at the level of the individual household and that of society as a whole became intimately linked with access to a range of prestige consumer durables The Market Makers charts the inter war origins of a process that would eventually transform these features of modern life from being luxuries to necessities for most British families Peter Scott examines how producers and retailers succeeded in creating mass though not universal market for new suites of furniture radios modern housing and some electrical and gas appliances while also exploring why some other goods such as refrigerators telephones and automobiles failed to reach the mass market in Britain before the 1950s Creating mass markets presented a formidable challenge for manufacturers and retailers Consumer durables required large markets Most involved significant research and development costs Some such as the telephone radio and car were dependent on complementary investments in infrastructure All required intensive marketing usually including expensive advertising in national newspapers

and magazines while some also needed mass production methods and output volumes to make them affordable to a mass market This study charts the pioneering efforts of entrepreneurs many of whom though once household names are now largely forgotten to provide consumer durables at a price affordable to a mass market and to persuade a sometimes reluctant public to embrace the new products and the consumer credit that their purchase required In doing so Scott shows that contrary to much received wisdom there was a consumer durables revolution in inter war Britain at least for certain highly prioritised goods

The Lawn Road Flats David Burke (Historian of intelligence and international relations),2014 The story of a modernist building with a significant place in the history of Soviet espionage in Britain where communist spies rubbed shoulders with British artists sculptors and writers The Isokon building Lawn Road Flats in Belsize Park on Hampstead's lower slopes is a remarkable building The first modernist building in Britain to use reinforced concrete in domestic architecture its construction demanded new building techniques But the building was as remarkable for those who took up residence there as for the application of revolutionary building techniques There were 32 Flats in all and they became a haunt of some of the most prominent Soviet agents working against Britain in the 1930s and 40s among them Arnold Deutsch the controller of the group of Cambridge spies who came to be known as the Magnificent Five after the Western movie The Magnificent Seven the photographer Edith Tudor Hart and Melita Norwood the longest serving Soviet spy in British espionage history However it wasn't only spies who were attracted to the Lawn Road Flats the Bauhaus exiles Walter Gropius László Moholy Nagy and Marcel Breuer the pre-historian V Gordon Childe and the poet and Bletchley Park intelligence officer Charles Brasch all made their way there A number of British artists sculptors and writers were also drawn to the Flats among them the sculptor and painter Henry Moore the novelist Nicholas Monsarrat and the crime writer Agatha Christie who wrote her only spy novel N or M in the Flats The Isokon building boasted its own restaurant and dining club where many of the Flats' most famous residents rubbed shoulders with some of the most dangerous communist spies ever to operate in Britain Agatha Christie often said that she invented her characters from what she observed going on around her With the Kuczynskis probably the most successful family of spies in the history of espionage in residence she would have had plenty of material
