An Introduction to the Geography of Tourism Velvet Nelson, 2017-03-03 Tourism is an astonishingly complex phenomenon that is becoming an ever greater part of life in today's global world. This clear and engaging text introduces undergraduate students to this vast subject through the lens of geography, the only field with the breadth to consider all of the aspects, activities, and perspectives that constitute tourism.

Global Interactions in the Early Modern Age, 1400-1800 Charles H. Parker, 2010-06-23 *Global Interactions in the Early Modern Age* is an interdisciplinary introduction to cross-cultural encounters in the early modern age, 1400-1800, and their influences on the development of world societies. In the aftermath of Mongol expansion across Eurasia, the unprecedented rise of imperial states in the early modern period set in motion interactions between people from around the world. These included new commercial networks, large-scale migration streams, global biological exchanges, and transfers of knowledge across oceans and continents. These in turn wove together the major regions of the world. In an age of extensive cultural, political, military, and economic contact, a host of individuals, companies, tribes, states, and empires were in competition. Yet they also cooperated with one another, leading ultimately to the integration of global space.

The Indian Ocean in World History Milo Kearney, 2004 The history of the Indian Ocean provides a snapshot of many of the key issues in world history.

Springs and Bottled Waters of the World Philip E. LaMoreaux, Judy T. Tanner, 2012-12-06 *Springs and Bottled Waters of the World* provides information for the general public, legal, and scientific professionals and governmental scientists about springs, mineral water, and thermal waters used for municipal, industrial, and agricultural water supplies, as well as for the rapidly expanding bottled water industry. The role of springs is described for ancient civilizations, military campaigns, and in more recent times for tourism and health spas of the world. In addition, their source, occurrence, and methods for development and use are described. In the preparation of this book, data were obtained from major hydrogeologic data bases and from leading hydrogeologists.

War, Nation, Memory Keith A. Crawford, Stuart J. Foster, 2007-12-01 The Second World War stands as the most devastating and destructive global conflict in human history. More than 60 nations representing 1.7 billion people, or three quarters of the world's population, were consumed by its horror. Not surprisingly, therefore, World War II stands as a landmark episode in history education throughout the world, and its prominent place in school history textbooks is almost guaranteed. As this book demonstrates, however, the stories that nations choose to tell their young about World War II do not represent a universally accepted truth about events during the war. Rather, wartime narratives contained in school textbooks typically are selected to instill in the young a sense of national pride, common identity, and shared collective memory. To understand this process, *War, Nation, Memory* describes and evaluates school history textbooks from many nations deeply affected by World War II, including China, France, Germany, Japan, USA, and the United Kingdom. It critically examines the very different and complex perspectives

offered in many nations and analyses the ways in which textbooks commonly serve as instruments of socialisation and in some cases propaganda Above all War Nation Memory demonstrates that far from containing neutral knowledge history textbooks prove fascinating cultural artefacts consciously shaped and legitimated by powerful ideological cultural and sociopolitical forces dominant in the present
