will Are they genuinely responsible for their actions These questions have persisted all through the history of philosophy but in the 21st century they have become defined more sharply and clearly than ever Indeed a vivid and mighty tension underlies today's intellectual struggles over free will On the one hand the rapid advances of several empirical disciplines notably neuropsychology and genetics threaten our instinctive affirmation that free will and moral responsibility exist On the other hand the depth and force of our instincts our powerful intuition that there is free will that there is moral responsibility present for most people an almost impenetrable barrier against the sweeping denial of free will suggested by empirical research The papers in this volume address this tension from a dual vantage point While drawing heavily upon traditional Jewish texts and teachings they also offer a blend of scientific philosophical psychological and social insights into this most mystifying of topics In addition they illuminate the concept of repentance a transformation of character that ranks in much of Jewish literature as the highest expression of free will *Leonard Maltin's Movie and Video Guide 1995* Leonard
