The Politics and Governance of Basic Education Brian Levy, Robert Cameron, Ursula Hoadley, Vinothan Naidoo, 2018-09-05 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. All over the world economic inclusion has risen to the top of the development discourse. A well performing education system is central to achieving inclusive development but the challenge of improving educational outcomes has proven to be unexpectedly difficult. Access to education has increased but quality remains low with weaknesses in governance comprising an important part of the explanation. *The Politics and Governance of Basic Education* explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education. Using the vivid example of South Africa, a country that had ambitious goals at the outset of its transition from apartheid to democracy, it explores how the interaction of politics and institutions affects educational outcomes. By examining lessons learned from how South Africa failed to achieve many of its goals, it constructs an innovative alternative strategy for making process combining practical steps to achieve incremental gains to re-orient the system towards learning.

Developing Teachers' Assessment Literacy Kim Koh, Cecille DePass, Sean Steel, 2019-07-29 Since the turn of the 21st century, developing teachers' assessment literacy has been recognized as one of the key levers for improving instructional practice and student learning in light of the education reforms worldwide. A substantial body of literature is focused on teachers' assessment literacy or teachers' capacity in assessment and teachers' continuing professional development in assessment. As we approach the third decade of the 21st century, developing teachers' assessment literacy needs to be more responsive to the need of both preservice and inservice teachers who come from linguistically and culturally diverse backgrounds. The authors concur that both preservice and inservice teachers in today's complex educational contexts require a deeper level of understanding of assessment. Additionally, teachers are highly encouraged to appreciate the history of educational assessment in different sociocultural and political contexts as well as to know how to determine the merits of a range of assessment practices best suited for their lesson planning and classroom teaching. In this book, the authors discuss significant aspects of developing teachers' assessment literacy in different sociocultural and political contexts. Based on their respective educational backgrounds, academic experiences, and applied fields of study, each of the authors presents a critical response to the topic of assessment. Their accounts represent the complexity of the subject through a breadth and range of content and perspectives. By expanding the terms of reference regarding assessment, the authors have developed a book with a far richer panorama on assessment as a springboard for inquiry.
