Borrego,2020-04-02 Better urban transport systems are needed to achieve a healthier environment and as a result a wide range of research has originated from many different countries These studies highlight the importance of innovative systems new approaches and original ideas which need to be thoroughly tested and critically evaluated before they can be implemented in practice To address the need to solve important pollution problems the papers included in this book focus on the relationship with urban transport There is also a growing need for integration with telecommunications systems and IT applications in order to improve safety security and efficiency The variety of topics
