Theory, Design, and Applications of Unmanned Aerial Vehicles A. R. Jha, Ph.D., 2016-11-18 This book provides a complete overview of the theory design and

applications of unmanned aerial vehicles It covers the basics including definitions attributes manned vs unmanned design considerations life cycle costs architecture components air vehicle payload communications data link and ground control stations Chapters cover types and civilian roles sensors and characteristics alternative power communications and data links conceptual design human machine interface sense and avoid systems civil airspace issues and integration efforts navigation autonomous control swarming and future capabilities *Nigeria's Fourth Republic, 1999-2021* Michael

Nwankpa,2022-11-18 This book reflects on Nigeria s fourth republic the country s longest democratic period since it gained independence from Great Britain It argues that although constitutional or political democracy has lasted for over two decades in Nigeria and seen three successful democratic changes of power Nigeria s democracy remains largely militarised During Nigeria s fourth republic political and socio economic affairs have been increasingly dominated by a pervasive military presence and ideology which has seen a redistribution of resources and government funds away from social programmes into an increase in security budgets weapons proliferation and internal military interventions and occupations This institutionalisation of violence has turned the country into a national security state where the rule of force and violence rather than dialogue and compassion reflect everyday reality Whilst acknowledging the history of militarisation during colonial and military rule this book makes a compelling argument for considering the distinct character of the Nigerian nation state s path to militarisation over the last 20 years of experimentation with democracy This book s fresh insights into the fourth republic s path to militarisation will be of interest to researchers of African politics security and development

Counter-Insurgency in Nigeria Akali Omeni,2017-09-08 This book offers a detailed examination of the counter insurgency operations undertaken by the Nigerian military against Boko Haram between 2011 and 2017 Based on extensive fieldwork conducted with military units in Nigeria Counter Insurgency in Nigeria has two main aims First it seeks to provide an understanding of the Nigerian military s internal role a role that today as a result of internal threats pivots towards counter insurgency The book illustrates how organizational culture historical experience institutions and doctrine are critical to understanding the Nigerian military and its attitudes and actions against the threat of civil disobedience today and in the past The second aim of the book is to examine the Nigerian military campaign against Boko Haram insurgents specifically plans and operations between June 2011 and April 2017 Within this second theme emphasis is placed on the idea of battlefield innovation and the reorganization within the Nigerian military since 2013 as the Nigerian Army and Air Force recalibrated themselves for COIN warfare A certain mystique has surrounded the technicalities of COIN operations by the Army against Boko Haram and this book aims to disperse that veil of secrecy Furthermore the work s analysis of the air force s role in counter insurgency is unprecedented within the literature on military warfare in Nigeria This book will be of great interest to students of military studies counter insurgency counter terrorism African politics and security studies in general

Inhabitable Infrastructures CJ Lim, 2017-05-25 *Inhabitable Infrastructures* Science fiction or urban future the follow up to *Food City* and *Smartcities* and *Eco Warriors* from one of the world's leading urban design and architectural thinkers explores the potential of climate change related multi use infrastructures that address the fundamental human requirements to protect to provide and to participate The stimulus for the infrastructures derives from postulated scenarios and processes gleaned from science fiction and futurology as well as the current body of scientific knowledge regarding changing environmental impacts on cities Science fiction is interdisciplinary by nature aggregates the past and present and evaluates both lay opinions and professional strategies in an attempt to develop foresight and to map possible futures The research culminates in the creation of innovative multi use infrastructures and integrated self sustaining support systems that meet the challenges posed through climate change and overpopulation and the reciprocal benefits of simultaneously addressing the threat and the shaping of cities J G Ballard has written that the psychological realm of science fiction is most valuable in its predictive function and in projecting emotions into the future The knowledge from the book is widely transferable constituting both solutions and speculative visions of future urban environments The book is indispensable reading for professionals and students in the fields of urban design architecture engineering and environmental socio politics

Lady First Amy S. Greenberg, 2020-01-21 The little known story of remarkable First Lady Sarah Polk a brilliant master of the art of high politics and a crucial but unrecognized figure in the history of American feminism While the Women's Rights convention was taking place at Seneca Falls in 1848 First Lady Sarah Childress Polk was wielding influence unprecedented for a woman in Washington D C Yet while history remembers the women of the convention it has all but forgotten Sarah Polk Now in her riveting biography Amy S Greenberg brings Sarah's story into vivid focus We see Sarah as the daughter of a frontiersman who raised her to discuss politics and business with men we see the savvy and charm she brandished in order to help her brilliant but unlikeable husband James K Polk ascend to the White House We

watch as she exercises truly extraordinary power as First Lady quietly manipulating elected officials shaping foreign policy and directing a campaign in support of America's expansionist war against Mexico And we meet many of the enslaved men and women whose difficult labor made Sarah's political success possible Sarah Polk's life spanned nearly the entirety of the nineteenth century But her own legacy which profoundly transformed the South continues to endure Comprehensive nuanced and brimming with invaluable insight Lady First is a revelation of our twelfth First Lady's complex but essential part in American feminism

Security Dynamics in the South China Sea Howard M Hensel, 2024-05-16 This volume examines the South China Sea's regional security dynamics highlighting the challenges and opportunities for both littoral and non littoral states The South China Sea is a vital pathway for the great container ships and tankers as well as for the naval vessels of today Indeed the security of the contemporary global economy is reliant more than ever upon the dependability of freedom of navigation through the waters of the South China Sea This volume concentrates on the security of the South China Sea sub region It is designed to help illuminate the contemporary security dynamics within this important sub region by highlighting its development the contemporary challenges and opportunities confronting both the littoral states and the non littoral powers that are active in the sub region and the policy responses of those states as they seek to defend and promote their national interests This book is composed of 16 chapters and is organized into five thematic sections Part I of the book is designed to set the historical context Part II examines some of the contemporary challenges and opportunities that present themselves in the sub region while Part III focuses on Chinese policy in the South China Sea sub region Parts IV and Part V analyse and evaluate the contemporary policies of the various littoral and non littoral powers that are active in the South China Sea sub region The collective analyses and assessments of the contemporary perceptions and policies of the various littoral and non littoral powers active in the South China Sea in response to the traditional and non traditional challenges within the sub region that are examined in the chapters contained in Parts III IV and V framed against the material presented in Parts I and II provides the basis for observations concerning areas of conflicting and coinciding interests in the concluding chapter of the book This book will be of interest to students of the South China Sea maritime security Asian politics and international relations

Shaping the Future of Power Lina Benabdallah, 2020-07-20 China's rise to power is one of the biggest questions in International Relations theory IRT and foreign policy circles Although power has been a core concept of IRT for a long time the faces and mechanisms of power as it relates to Chinese foreign policymaking has changed the contours of that debate The rise of China and other powers across the global political arena sparks a new visibility for different kinds of encounters between states particularly between China and other Global South states These encounters are more visible to IR scholars because of the increasing influence that rising powers have in the international system This book shows that foreign policy encounters between rising powers and Global South states do not necessarily exhibit the same logics behaviors or investment strategies of Euro American hegemons Instead they have distinctive features that require new

theoretical frameworks for analysis *Shaping the Future of Power* probes the types of power mechanisms that build diffuse and project China's power in Africa. One must take into account the processes of knowledge production, social capital formation, and skills transfers that Chinese foreign policy directs toward African states to fully understand China's power building mechanisms. The relational power framework requires these elements to capture both the material aspects and ideational, people-centered aspects to power. By examining China's investments in human resource development programs for Africa, the book reveals a vital yet undertheorized aspect of China's foreign policy making.
