Sports Et Handicaps Le Handisport:

Sport et Handicap en Europe/Sport and Disability in Europe, 2014-04-01 56% des citoyens européens en situation de handicap déclarent ne pratiquer aucune activité physique régulière Une situation paradoxale au regard des nombreuses études montrant que le sport est l'un des leviers les plus efficaces pour favoriser l'inclusion des personnes en situation de handicap L'un des défis porte sur la formation du personnel encadrant Une adaptation des savoirs techniques et pédagogiques aux pratiques et aux publics handicapés semble nécessaire C'est ce constat qui a conduit le think tank Sport et Citoyenneté réunir un groupe de travail européen sur cette question Cet ouvrage est le résultat de ces trois années de changes Il fournit plusieurs pistes de réflexion sur le développement avec une priorité forte le développement d'une base légale pour l'intégration de cours sportifs sur la façon d'appréhender le handicap dans les cursus de formation aux métiers du sport 56% of European citizens with a disability say that they never do any regular physical activity This is a paradox in view of the many studies showing that sport is one of the most effective ways of encouraging inclusion One of the challenges concerns the training of sports and physical activity instructors and coaches Technical and teaching knowledge need to be adapted to take account of disabled sport practice and persons with a disability This observation led the Sport and Citizenship think tank to bring together a European work group on this subject This work is the result of three years of discussions It provides various points for consideration on the development of an appropriate training course which will help support and integrate persons with a disability in the best possible way

French Sports Films

Jonathan Irvine, 2025-12-18 Examining French sports films from a cinematic and socio-cultural perspective, this book takes a close look at the characteristics that separate French sports films from Hollywood sports films and sports films produced in other countries and asks what those characteristics can tell us about wider French culture and society Focusing in particular on depictions of masculinity in French sports films and how they have evolved over time, this book argues that recent decades have seen a shift away from focusing on macho males towards a greater exploration of male vulnerability, depictions that go

beyond the outcome of sporting contests and relate to wider issues such as what it means to be a man partner father or son It also argues that many of these films have offered only superficial engagement with issues concerning women s participation in sport and considers the extent to which race ethnicity and social class have also shaped the French sports film Filling a significant gap in the literature on French cinema and the study of sports films in general this is fascinating reading for anybody with an interest in sport cinema or French history culture and society
