Empowering Excellence Jeff Halstead, 2014-07-02 Empowering Excellence inspires a revolution in teaching and assessment practices. These methods of teaching and grading represent a major step ahead in how teachers assess and interact with students. Empowering Excellence presents 12 significant shifts that encourage motivation, build confidence, and measure what students know and are able to do based on the Common Core State Standards or equivalent standards in a highly supportive student-centered environment. Teachers, administrators, and education professors will find ideas that will transform classrooms into places where students are filled with confidence and empowered to strive for excellence. **Le Littéraire dans le quotidien** Joanna G. Luks, 2013-08-26 The literary in the every day is a resource for a transdisciplinary approach to reading/writing at the first and second year levels of college French. These will serve as foreign language templates in the form of an OER to bridge the well-known divide between lower-level language courses and upper-level literature content courses. Language teachers with the help of these templates can develop their own reading and writing activities to highlight the metaphorical. Reshaping Teacher Thinking, Planning and Practice Using Embedded Assessment Letina Ngwenya Jeranyama, 2001 ENC Focus, 2001 **European Higher Education Area 2030: Bridging Realities for Tomorrow's Higher Education** Adrian Curaj, Cezar Mihai Hâj, Remus Pricopie, 2025-03-29 This open access book presents the major outcomes of the fifth edition of the Future of Higher Education Bologna Process Researchers Conference FOHE BPRC5 organized by the Executive Agency for Higher Education Research Development and Innovation Funding UEFISCDI prior to the 2024 Ministerial Conference in Tirana. The Conference is considered a landmark in the European Higher Education Area encouraging dialogue between researchers and policy makers. The resulting book provides a forward-looking perspective on how the EHEA is evolving in response to current challenges and opportunities by focusing on topics such as internationalization, equity, and employability, fundamental values, impact of digitalization, or innovative learning and teaching. The papers presented offer insights in these areas illustrating successful or failed implementations within the EHEA and are published in open access format to ensure that the researchers' perspectives are widely available to European policy and decision makers. Since 2024 marks the first post-pandemic edition of the Conference, it is a good moment to not only take stock of the challenges brought by the Covid-19 pandemic and the war in Ukraine but also to explore how scientific research can support policy in shaping the directions for the future to come. **Which Degree Guide**, 2001 **Partnerships with Business and the Community**, 2001 **For the Learning of Mathematics**, 1995 Supporting Combined-arms Combat Capability with Shared Electronic Maintenance Facilities William G. Wild, Rand Corporation, 1990 The U.S. Army shows signs of shifting away from using weapon system specific test diagnostic equipment and toward using more broadly capable versions of equipment that can isolate faults within subsystems and components from a number of different weapon systems, e.g., the proposed integrated family of test equipment IFTE. As a result, weapon systems that once

had uncontested access to specialized test equipment will now be relying on a common facility and hence their availabilities will become linked This study focuses on two systems the M1 tank and M2 M3 Bradley fighting vehicle that are linked through a common reliance on direct support electrical systems test set DSESTS test equipment The author finds that greater weapon system availability and more robust support may be attainable at constant cost by emphasizing resources that are fungible across weapon systems such as test equipment and improved theater transportation for selected high priority items The report also demonstrates a multiple weapon systems methodology that is instrumental in identifying such potential improvements
