The Invisible Hand in Popular Culture Paul Arthur Cantor, 2012-11-05 Popular culture often champions freedom as the fundamentally American way of life and celebrates the virtues of independence and self reliance But film and television have also explored the tension between freedom and other core values such as order and political stability What may look like healthy productive and creative freedom from one point of view may look like chaos anarchy and a source of destructive conflict from another Film and television continually pose the question Can Americans deal with their problems on their own or must they rely on political elites to manage their lives In this groundbreaking work Paul A Cantor explores the ways in which television shows such as Star Trek The X Files South Park and Deadwood and films such as The Aviator and Mars Attacks have portrayed both top down and bottom up models of order Drawing on the works of John Locke Adam Smith Alexis de Tocqueville and other proponents of freedom Cantor contrasts the classical liberal vision of America particularly its emphasis on the virtues of spontaneous order with the Marxist understanding of the culture industry and the Hobbesian model of absolute state control The Invisible Hand in Popular Culture concludes with a discussion of the impact of 9 11 on film and television and the new anxieties emerging in contemporary alien invasion narratives the fear of a global technocracy that seeks to destroy the nuclear family religious faith local government and other traditional bulwarks against the absolute state

Torture As Public Policy James P. Pfiffner, 2015-11-17 After September 11 2001 the Bush Administration decided that the most important intelligence about terrorism would come from the interrogation of captives suspected of terrorism As a result many detainees were subject to harsh interrogation techniques that at times amounted to torture Here James P Pfiffner authoritatively examines the policy directives operational decisions and leadership actions of the Bush Administration that reversed centuries of US policy on the treatment of enemy prisoners He shows how the serious reservations of career military lawyers about these policies were overcome by the political appointees of the Bush Administration Pfiffner then analyses the philosophical and legal underpinnings of the policies and practices that have led to the denunciation of the United States policies by its allies and adversaries throughout the world Looking ahead Pfiffner anticipates Obama administration policy changes to restore U S credibility and accountability In all Torture as Public Policy is a model of detailed policy analysis that demonstrates how greatly public policy matters beyond the back corridors of bureaucracy

Making Human Rights a Reality Emilie M. Hafner-Burton, 2013-03-21 In the last six decades one of the most striking developments in international law is the emergence of a massive body of legal norms and procedures aimed at protecting human rights In many countries though there is little relationship between international law and the actual protection of human rights on the ground Making Human Rights a Reality takes a fresh look at why it's been so hard for international law to have much impact in parts of the world where human rights are most at risk Emilie Hafner-Burton argues that more progress is possible if human rights promoters work strategically with the group of states that have dedicated resources to human rights protection These human rights stewards can focus their resources on places where the tangible benefits to human rights are greatest Success will require setting priorities as well as engaging local stakeholders such as nongovernmental organizations and national human rights institutions To date promoters of international human rights law have relied too heavily on setting universal goals and procedures and not enough on assessing what actually works and setting priorities Hafner-Burton illustrates how with a different strategy human rights stewards can make international law more effective and also safeguard human rights for more of the world population *Screening Sherlock* James Chapman, 2025-04-01 Screening Sherlock is the first book length academic study of the film and television career of the most famous detective in fiction Chapman explores the contexts adaptation strategies and critical reception of Sherlock Holmes and Dr Watson on film and television in Britain and the United States The book includes case studies of such famous Holmes impersonators as William Gillette Basil Rathbone Peter Cushing Jeremy Brett and Benedict Cumberbatch as well as charting a path through many lesser known productions From early cinema to the Hollywood studio system and from heritage drama to contemporary postmodern television Screening Sherlock is an indispensable work for all aficionados of Arthur Conan Doyle's consulting detective of Baker Street **American Silent Horror, Science Fiction and Fantasy Feature Films, 1913-1929** John T. Voices from Post-Saddam Iraq Victoria Fontan, 2008-12-30 Even today most Americans can not understand just why the fighting continues in Iraq whether our nation should be involved there now and how we could change our tactics to help establish a lasting peace in the face of what many fear will become a full fledged civil war In the book at hand Victoria Fontan a professor of peace and conflict studies who lived worked and researched in Iraq shares pointed insights into the emotions of Iraq's people and specifically how democratization has in that country come to be associated with humiliation Including interviews with common people in Iraq this work makes clear how laudable intentions do not always bring the desired result when it comes to international conflict and cross cultural psychology For example Fontan explains one might consider the comment of a young Shiite The greatest humiliation of all was to see foreigners topple Saddam not because we loved him but because we could not do it ourselves This gripping text is focused on a new and growing area of human psychology humiliation studies In it this leader at the United Nations mandated University for Peace spotlights aspects of U.S. actions and Iraqi perceptions that have fueled ongoing conflict and left some increasingly outspoken residents of the U.S. and the rest of the world demanding that foreign forces be withdrawn and the Iraqis left to their own accord The work examines issues including how and when the Iraqis began to see the United States as not a liberator but as an occupier how both Abu Ghraib and our ensuing handling of the scandal heightened Iraqi humiliation and fighting how we've fueled the ethno religious unrest that still rages today and how the Post Saddam elections paved the way for civil war Fontan also describes the role of women in Iraq who may ultimately be an important key to peace and explains her views on the new role the U.S. may play to better help establish peace
