Tesccc Evaluation Of Conic Sections And Their:

Conic Sections in Context [Lesson Plan] Elizabeth Richardson, 2011 This project is a discovery based multi sensory unit composed of a series of lessons designed to teach high school students about conic sections This four week unit focuses on developing students abilities to identify and or create mathematical rules from tangible patterns applications of conic sections Its primary purpose is to examine conic sections and create connections between the geometric and algebraic definitions As well this unit is designed to challenge students to discover modern day Activities of this unit include computer based explorations of conic sections discussions of the etymology of each conic section construction of each conic section using rope and sidewalk chalk discovery of the standard formula for each conic section and individual and group presentations on artistic creations and modern day applications of conic sections This unit is designed to be presented in the second semester of an Algebra II course Throughout this unit students work in a number of environments to meet the need of each learning style As well students reflect daily in the form of a minute paper These daily reflections facilitate an ongoing assessment of classroom dynamics Having been implemented at Los Alamos High School in March of 2011 assessment of student success and unit plan effectiveness included samples of students work comparison of students pretest post test results and a review of student and colleague reflections personal progress analysis and unit evaluation surveys Overall assessment data supports the conclusion that this unit successfully fulfilled the target goals In addition assessment data suggests the following revisions of the plan starting the unit with a webquest to establish relevancy reorganizing the unit to address one conic section each lesson using a variety of approaches and differentiating assessment [An Elementary Treatise on Conic Sections](#) Charles Smith, 1883 **A Geometrical Treatise on the Conic Sections** William Wallace, 1837
