

Solving Quadratic Equations by Factorising

Solving quadratic equations by factorising allows us to calculate values of the unknown variable in a quadratic equation using factorisation.

 **Example** Solve $x^2 - 8x + 15 = 0$

$$(x - 3)(x - 5) = 0$$

$$x - 3 = 0$$

$$x = 3$$

$$x - 5 = 0$$

$$x = 5$$

Quadratic Equations and Functions Workbook Norman Balason, 2021-06-19 The QUADRATIC EQUATIONS AND FUNCTIONS WORKBOOK is a resource that Algebra 2 students can use to practice solving quadratic equations, writing quadratic equations, graphing quadratic functions, writing quadratic functions, and solving word problems that involve quadratic equations and functions. There are nine sections in this workbook. Example problems with step-by-step solutions precede each type of problem for sections one through nine. Students should study these examples before starting the problems. This workbook also contains the step-by-step solutions for all problems. Section 1 begins with problems for students to use square roots to solve quadratic equations in simplest terms. The denominator for answers is rationalized. In Section 2, students solve quadratic equations by factoring and by using the Zero Product Property. Section 3 includes problems where students solve quadratic equations by completing the square. This workbook contains the derivation of the Quadratic Formula. In Section 4, students use the Quadratic Formula to solve quadratic equations. This workbook includes the derivation of the sum and product of roots for a quadratic equation in standard form. Section 5 is where students write quadratic equations given their roots. Students can use the Zero Product Property or the sum and product of its roots to do these problems. In Section 6, students explain why the graph of the quadratic function, which is called a Parabola, will open upward or downward. Then they determine if the graph will have a minimum or a maximum. Section 7 is where students graph quadratic functions that are in standard, factored, and vertex form. In Section 8, students use the coordinates for points on the graph of a quadratic function to write the quadratic function in factored, vertex, and standard form. Section 9 is where students solve word problems that involve quadratic equations and quadratic functions. Finally, there are step-by-step solutions for all problems.
