Most people want to reach their maximum potential and the use of tools are no different. Some say power is influence. Thanks to these powers VR can influence and affect education in ways that no technology tool has in the past. This book will help people understand the power and true potential of virtual reality or VR. The prime directive of this book is to provide educators with a way of thinking about how to use virtual reality in education in order to reveal its true superpowers. And to arm educators with several hands on lessons to get them started on implementing VR as a tool to enhance learning outcomes. Ultimately the book aims to have educators clearly understand VR's role in transforming education thus reaching its maximum potential.
