Inquiry in Music Education Hildegard C. Froehlich, Carol Frierson-Campbell, Debbie Ann Rohwer, Marie McCarthy, Darryl A. Coan, 2013 Provides an introduction to research and scholarship in music education This textbook covers topic formulation information literacy reading and evaluating research studies and planning and conducting original studies within accepted guidelines based on research conventions in music the

other arts education and the humanities Skills in research and scholarship introduce students to the language and protocols by which to succeed in today's competitive market of grant writing arts advocacy and public outreach as a contributing member of the community of music educators Following the legacy begun by Rainbow and Froehlich in Research in Music Education published in 1987 the objectives of this book are To expand what is meant by music education and research To help students find their niche in those definitions and To teach tangible skills that are useful for music educators with diverse instructional goals and career aspirations Blackwells website [A Practical Research Process for Developing a Sustainable Built Environment in Emerging Economies](#) Andrew Ebekoziem, Clinton Ohis Aigbavboa, Wellington Didibhuku

Thwala, 2025-02-19 A Practical Research Process for Developing a Sustainable Built Environment in Emerging Economies aims to fill the dearth of practical research guidance and reference material with specific focus on the built environment in developing countries Global policy agendas such as Agenda 2030 the SDGs highlight the importance and growth of research and knowledge from emerging nations who are increasingly contributing to research that is critical for development and advancement The role of built environment practitioners will continue to evolve by building on the sound foundations laid down by the professions and by exploiting to the full the new technologies available to us through conducting innovative research but more guidance on the research process is necessary to ensure the integrity and quality of the output This book has been structured so that each chapter is largely free standing allowing the reader undergraduate postgraduate or practitioner to reference the material with ease It aims to provide practical guidance on conducting research and on writing a dissertation or report and begins by considering the general research background in a built environment context It then covers research ethics before moving on to discuss the importance of selecting the right research topic and title and writing a clear abstract The chapters then cover introducing a research project and the authors include a section on the problem statement research questions aims and objectives research gaps and motivations for the study The book goes on to cover the literature review section theoretical and conceptual frameworks the various types of methodological approaches and when to apply them The findings section discussion of the results and the study's implications are then discussed before the final chapters cover the conclusion and recommendations The book provides a useful reference for higher education students graduates postgraduates and practitioners engaged in all aspects of construction and built environment research

[Engaging Adolescent Students in Contemporary Classrooms: Emerging Research and Opportunities](#) Nagabhushan, Prathiba, 2018-02-02 Preparation for university study and integration into the workforce is the academic goal in the final years of secondary education This preparedness can only be achieved through the motivation and involvement of students in secondary education programs which will lead to successful outcomes Engaging Adolescent Students in Contemporary Classrooms Emerging Research and Opportunities is a critical scholarly resource that examines the importance of motivation and concentration during the final years of secondary education in order to promote successful outcomes and experiences for

students in higher education environments Featuring coverage on a wide range of topics such as failure avoidance mastery orientation and student engagement this book is geared toward academicians practitioners and researchers seeking relevant research on preparing students for successful college and university careers through motivation and engagement

Handbook of Quantitative Methods for Educational Research Timothy Teo,2014-02-07 As part of their research activities researchers in all areas of education develop measuring instruments design and conduct experiments and surveys and analyze data resulting from these activities Educational research has a strong tradition of employing state of the art statistical and psychometric psychological measurement techniques Commonly referred to as quantitative methods these techniques cover a range of statistical tests and tools Quantitative research is essentially about collecting numerical data to explain a particular phenomenon of interest Over the years many methods and models have been developed to address the increasingly complex issues that educational researchers seek to address This handbook serves to act as a reference for educational researchers and practitioners who desire to acquire knowledge and skills in quantitative methods for data analysis or to obtain deeper insights from published works Written by experienced researchers and educators each chapter in this handbook covers a methodological topic with attention paid to the theory procedures and the challenges on the use of that particular methodology It is hoped that readers will come away from each chapter with a greater understanding of the methodology being addressed as well as an understanding of the directions for future developments within that methodological area
