User's Manual for an Army National Guard (ARNG) Armor and Mechanized Infantry Gunnery Training Assessment Database Monte D. Smith, 1998 This user's manual describes a longitudinal database designed to permit the storage retrieval and analyses of gunnery related data generated with Army National Guard ARNG armored and mechanized infantry units The database was developed as part of an assessment of the Simulation in Training for Advanced Readiness SIMITAR time compressed gunnery training strategy as implemented in a test ARNG armored brigade Smith in publication It contains gunnery performance measures from this test brigade and from six other enhanced comparison brigades where the SIMITAR training strategy was not introduced These measures were collected from 1993 1997 and include first run and final live fire Table VIII gunnery qualification scores tank main gun ammunition expenditures related measures information needed for assessing the impact of different training strategy interventions and space set aside for recording the outcomes of training aids devices simulators and simulations TADSS usage The database is configured within a software program known as the Statistical Package for the Social Sciences SPSS Version 6.1 for Windows Its files can be exported in a number of formats including spreadsheet and database management programs as well as into a number of other statistical utilities This user's manual will help ARNG database managers use the SIMITAR database as a convenient repository for gunnery performance and related information and as a resource for future gunner related strategy impact investigations P i *Proceedings of International Conference on Computational Intelligence and Data Engineering* Nabendu Chaki, Agostino Cortesi, Nagaraju Devarakonda, 2017-12-19 The book presents high quality research work in cutting edge technologies and most happening areas of computational intelligence and data engineering It contains selected papers presented at International Conference on Computational Intelligence and Data Engineering ICCIDE 2017 The conference was conceived as a forum for presenting and exchanging ideas and results of the researchers from academia and industry onto a common platform and help them develop a comprehensive understanding of the challenges of technological advancements from different viewpoints This book will help in fostering a healthy and vibrant relationship between academia and industry The topics of the conference include but are not limited to collective intelligence intelligent transportation systems fuzzy systems Bayesian network ant colony optimization data privacy and security data mining data warehousing big data analytics cloud computing natural language processing swarm intelligence and speech processing *The Progressive Fish Culturist* U.S. Fish and Wildlife Service, 1997 User's Guide to the National Fire Occurrence Data Library Richard F. Yancik, 1982 Assessment of the SIMITAR Gunnery Training Strategy Through Development of a Database of Gunnery Outcome Measures Monte D. Smith, 1998 This report assesses the impact of the Simulation in Training for Advanced Readiness SIMITAR compressed gunnery training strategy for Army National Guard ARNG armored and mechanized infantry units This strategy emphasizes the use of state of the art training aids devices simulators and simulations TADSS in response to challenges posed by time and range

constraints experienced by ARNG combat units Assessment entailed development of a longitudinal database of gunnery related information generated before 1993 1994 and during 1995 1997 SIMITAR strategy implementation This information was collected from armored and mechanized infantry units from a SIMITAR test brigade and from six enhanced no SIMITAR comparison brigades Overall the SIMITAR training strategy was successful Results showed that final crew level tank gunnery qualification on Table 8 did not differ either between the SIMITAR and comparison units or within the SIMITAR test unit across data collection years Bradley Fighting Vehicle Table 8 qualification rate however did favor the comparison units Perhaps more importantly the SIMITAR strategy permitted most 94% fully staffed SIMITAR platoons to complete gunnery Table 8 with a 45% overall qualification rate and enabled company and higher level maneuver training objectives to be accomplished all within a normal 39 day yearly training calendar Suggestions for research needed to extend SIMITAR training strategy benefits are provided DITC **Research Report** ,1998 **Applied Logistic Regression Analysis** Scott Menard,2002 The focus in this Second Edition is again on logistic regression models for individual level data but aggregate or grouped data are also considered The book includes detailed discussions of goodness of fit indices of predictive efficiency and standardized logistic regression coefficients and examples using SAS and SPSS are included More detailed consideration of grouped as opposed to case wise data throughout the book Updated discussion of the properties and appropriate use of goodness of fit measures R square analogues and indices of predictive efficiency Discussion of the misuse of odds ratios to represent risk ratios and of over dispersion and under dispersion for grouped data Updated coverage of unordered and ordered polytomous logistic regression models Proceedings of the Statistical Computing Section American Statistical Association. Statistical Computing Section,1999 Papers presented at the annual meeting of the American Statistical Association **Multilevel and Longitudinal Modeling with IBM SPSS** Ronald H. Heck,Scott L. Thomas,Lynn N. Tabata,2022-04-11 Multilevel and Longitudinal Modeling with IBM SPSS Third Edition demonstrates how to use the multilevel and longitudinal modeling techniques available in IBM SPSS Versions 25 27 Annotated screenshots with all relevant output provide readers with a step by step understanding of each technique as they are shown how to navigate the program Throughout diagnostic tools data management issues and related graphics are introduced SPSS commands show the flow of the menu structure and how to facilitate model building while annotated syntax is also available for those who prefer this approach Extended examples illustrating the logic of model development and evaluation are included throughout the book demonstrating the context and rationale of the research questions and the steps around which the analyses are structured The book opens with the conceptual and methodological issues associated with multilevel and longitudinal modeling followed by a discussion of SPSS data management techniques that facilitate working with multilevel longitudinal or cross classified data sets The next few chapters introduce the basics of multilevel modeling developing a multilevel model extensions of the basic two level model e g three level models models for binary and ordinal outcomes and troubleshooting

techniques for everyday use programming and modeling problems along with potential solutions Models for investigating individual and organizational change are next developed followed by models with multivariate outcomes and finally models with cross classified and multiple membership data structures The book concludes with thoughts about ways to expand on the various multilevel and longitudinal modeling techniques introduced and issues e g missing data sample weights to keep in mind in conducting multilevel analyses Key features of the third edition Thoroughly updated throughout to reflect IBM SPSS Versions 26 27 Introduction to fixed effects regression for examining change over time where random effects modeling may not be an optimal choice Additional treatment of key topics specifically aligned with multilevel modeling e g models with binary and ordinal outcomes Expanded coverage of models with cross classified and multiple membership data structures Added discussion on model checking for improvement e g examining residuals locating outliers Further discussion of alternatives for dealing with missing data and the use of sample weights within multilevel data structures Supported by online data sets the book s practical approach makes it an essential text for graduate level courses on multilevel longitudinal latent variable modeling multivariate statistics or advanced quantitative techniques taught in departments of business education health psychology and sociology The book will also prove appealing to researchers in these fields The book is designed to provide an excellent supplement to Heck and Thomas s *An Introduction to Multilevel Modeling Techniques* Fourth Edition however it can also be used with any multilevel or longitudinal modeling book or as a stand alone text

Handbook of Research on Ethnic Minority Entrepreneurship Leo Paul Dana, 2007 Professor Dana and his colleagues have carefully and successfully put together a collection of chapters on ethnic minority entrepreneurship from all parts of the world The book comprises eight parts and 49 chapters Undoubtedly given the massive size and content of a 835 page book it is fair to ask is it value for money The answer is unequivocally yes A further comment on the content of the book should probably reassure potential readers and buyers of the book This collection is undoubtedly rich creative and varied in many respects Therefore it will be of great benefit to researchers and scholars alike I will strongly recommend this book to researchers students teachers and policy makers

Aminu Mamman International Journal of Entrepreneurial Behaviour and Research The volume presents an impressive

panorama of studies on ethnic entrepreneurships ranging from Dalits in India to Roma entrepreneurs in Hungary B P Corrie Choice From a focus on middle man minorities in the 1950s the study of minority ethnic entrepreneurship has evolved into a vast undertaking A major ingredient in this expansion is the massive population movements of the past thirty years that have created ethnic minority communities in almost all advanced economies From New York to San Francisco from Birmingham to Hamburg from the Chinese in Canada to the Turks in Finland to the Ghanians in South Africa to the Lebanese in New Zealand more than twenty chapters in this volume treat small scale ethnic entrepreneurship and the cultural and institutional resources which support it At the other end of the spectrum the ethnic Chinese have created ever larger multi divisional enterprises in the host societies of Southeast Asia At the mid point of the spectrum analyzed in an elegant paper by Ivan Light is the recently identified transmigrant entrepreneur accultured in two societies but assimilated in neither whose special endowments have provided the lynchpin for for much of the international trade expansion in the global economy over the past decade And Dana and Morris provide us with much more Afro American entrepreneurship caste and class the theory of clubs women ethnic entrepreneurs minority ethnicity and IPOs In the quality of its contributions and in the reach of its coverage this Handbook attains a very high standard Peter Kilby Wesleyan University US The new Handbook of Research on Ethnic Minority Entrepreneurship edited by L o Paul Dana constitutes a major contribution to the literature on ethnic enterprise Unlike previous work which tended to focus on one country or one region of the world this book is global in scope You will find chapters on America Europe and Asia as well as integrative essays that review important principles and concepts from the literature on ethnic entrepreneurship I particularly appreciate the historical and evolutionary framework within which the contributions are situated This book belongs on the shelf of everyone who has an interest in immigration and entrepreneurship or ethnic entrepreneurship more generally Howard Aldrich University of North Carolina US This exhaustive interdisciplinary Handbook explores the phenomena of immigration and ethnic minority entrepreneurship in light of marked changes since the mid twentieth century and the advent of easier more affordable travel and more open and integrated national economies The international contributors key experts in their respective fields illustrate that myriad ethnic minorities exist across the globe and that their entrepreneurship can and does significantly influence national economies The contributors go on to promote our understanding of which factors make for successful entrepreneurship and perhaps more importantly how negative political consequences that members of successful entrepreneurial ethnic minorities might face can be minimized This extensive collection of current research on entrepr

Family Economics and Nutrition Review ,1995 **Newsletter** University of Michigan Computing Center,1971 **Advanced Techniques of Population Analysis** S.S. Halli,K.V. Rao,2013-06-29 Although I feel honored to write a foreword for this important book it is a task that I approach with some trepidation The topics covered in the book summarize the current state of the art in technical demography However my knowledge and expertise with respect to technical demography are limited to the most

fundamental and intermediate level methods hence critical commentary on the contents of this volume is beyond my scope in this fore word Since I have some understanding of the logic and substantive aspects of the methods rather than the complicated mathematics used in describing them my comments will necessarily be restricted to the book s general organization and content To date most texts published on technical demography have been limited to traditional demographic methods sources and limitations of data life table construction and applications standardization techniques various methods for preparing population estimates and forecasts etc However population specialists have in recent years been developing and successfully applying a variety of sophisticated techniques not covered in the more standard introductory texts In addition many traditional methods that are unique to the demographic discipline have been improved and extended

Bootstrapping Christopher Z. Mooney, Robert D. Duval, Robert Duvall, 1993-08-09 This book is clear and well written anyone with any interest in the basis of quantitative analysis simply must read this book well written with a wealth of explanation Dougal Hutchison in Educational Research Using real data examples this volume shows how to apply bootstrapping when the underlying sampling distribution of a statistic cannot be assumed normal as well as when the sampling distribution has no analytic solution In addition it discusses the advantages and limitations of four bootstrap confidence interval methods normal approximation percentile bias corrected percentile and percentile t The book concludes with a convenient summary of how to apply this computer intensive methodology using various available software packages

Gold, 2024-08-06 Statistics for Social Understanding introduces statistics as it s used in the social sciences as a tool for advancing understanding of the social world The authors provide thorough coverage of social science statistical topics a balanced approach to calculation and step by step directions on how to use both SPSS and Stata software giving students the ability to analyze data and explore exciting questions In Depth boxes encourage critical thinking by tackling tricky statistical queries and each chapter concludes with a chapter summary a section on using Stata a section on using SPSS and practice problems All problems have been accuracy checked by an outside panel of reviewers Readily available datasets for classroom use include material from institutions such as the American National Election Study General Social Survey World Values Survey and the School Survey on Crime and Safety Statistics for Social Understanding is accompanied by a learning package written entirely by author Tina Wildhagen that is designed to enhance the experience of both instructors and students

Education and Class Yuan Cheng, 1994 This book compares the relative chances of occupational success of the Chinese diaspora in Great Britain and the United States Using various methods of statistical analysis the book looks at the relative level of occupational attainment and attempts to bring out the effects of education in determining occupational success for Chinese as well as other ethnic groups in the two countries *Issues and Methods in Rorschach Research* John E. Exner,

Jr.,2013-12-19 Any research that involves the use of the Rorschach or focuses on the nature of the Rorschach must be framed in the context of the basic principles that mark any scientific investigation However most texts concerning research design or data analysis do not deal directly with many of the unusual issues that confront investigators who use the Rorschach in their research The nature of the test and test procedures are somewhat different than for most psychological tests and often these special characteristics become critical when research designs are formulated Similarly some of the data of the tests are quite different from the customary distributions yielded by other psychological tests Thus special care must be exercised when considering the variety of tactics that might be used in analyzing the test data This text is unique in that it is specific to the Rorschach Bringing together experts on Rorschach research this volume presents in depth treatments of every facet of methodology from design to analysis as well as more conceptual issues It is designed to aid investigators in contending effectively with the many difficult challenges that are often encountered in Rorschach research This work adds to the information already available to the accomplished researcher as well as provide some enlightenment for the Rorschach research novice It dispels the notion that rote methodology or analyses can be applied routinely to studies involving the Rorschach And it helps to improve the quality of investigations in which the test is included and contribute in some way to the improvement of the overall research yield in the Rorschach community
