Sri Lanka Education Sector Assessment Halil Dundar, Benoit Millot, Michelle Riboud, Mari Shoji, Harsha Aturupane, Sangeeta Goyal, Dhushyanth Raju, 2017-06-16 A country's education system plays a pivotal role in promoting economic growth and shared prosperity. Sri Lanka has enjoyed high school attainment and enrollment rates for several decades. However, it still faces major challenges in the education sector and these challenges undermine the country's inclusive growth goal and its ambition to become a competitive upper middle income country. The authors of *Sri Lanka Education Sector Assessment: Achievements, Challenges and Policy Options* offer a thorough review of Sri Lanka's education sector from early childhood education through higher education. With this book, they attempt to answer three questions: How is Sri Lanka's education system performing, especially with respect to participation rates, learning outcomes, and labor market outcomes? How can the country address the challenges at each stage of the education process, taking into account both country and international experience and also best practices? Which policy actions should Sri Lanka make a priority for the short and medium term? The authors identify the most critical constraints on performance and present strategic priorities and policy options to address them. To attain inclusive growth and become globally competitive, Sri Lanka needs to embark on integrated reforms across all levels of education. These reforms must address both short-term skill shortages and long-term productivity. As Sri Lanka moves up the development ladder, the priorities of primary, secondary, and postsecondary education must be aligned to meet the increasingly complex education and skill requirements.

Enhancing Food Security and Trade Resilience in Sustainable Agricultural Systems Wenjin Long, Catherine Keske, Fuyou Guo, 2025-10-23 Food security is a critical global challenge influenced by complex interactions between agriculture, trade, and market dynamics. As countries navigate the impacts of climate change and economic fluctuations, sustainable agricultural practices become essential for ensuring a stable food supply. International trade agreements such as the China-Pakistan Free Trade Agreement and the pathways established by the Belt and Road Initiative significantly shape domestic agricultural economies. Understanding how these agreements affect food access, sovereignty, and production sustainability is crucial for developing resilient food systems. Despite the recognised

importance of these interconnections there is limited research that comprehensively examines the interplay between trade policies and sustainable agricultural practices in supporting food security Many existing studies focus on individual aspects neglecting the integrated nature of these systems This Research Topic aims to fill this gap by exploring how trade dynamics local agricultural strategies and policy frameworks can enhance food security and resilience By synthesising diverse case studies and analyses we aim to identify best practices and effective pathways to strengthen both trade and local agricultural sustainability in various contexts
