Sustainable Urban Transport Financing from the Sidewalk to the Subway Arturo Ardila-Gomez, Adriana Ortega-Sánchez, 2015-12-31 Urban transport systems are essential for economic development and improving citizens quality of life To establish high quality and affordable transport systems cities must ensure their financial

sustainability to fund new investments in infrastructure while also funding maintenance and operation of existing facilities and services. However, many cities in developing countries are stuck in an underfunding trap for urban transport in which large up front investments are needed for new transport infrastructure that will improve the still small scale and perhaps poor quality systems but revenue is insufficient to cover maintenance and operation expenses let alone new investment projects. The urban transport financing gap in these cities is further widened by the implicit subsidies for the use of private cars which represent a minority of trips but contribute huge costs in terms of congestion, sprawl, accidents and pollution. Using an analytical framework based on the concept of Who Benefits Pays, 24 types of financing instruments are assessed in terms of their social, economic and environmental impacts and their ability to fund urban transport capital investments, operational expenses and maintenance. Urban transport financing needs to be based on an appropriate mix of complementary financing instruments. In particular, for capital investments, a combination of grants from multiple levels of government and loans together with investments through public private partnerships could finance large projects that benefit society. Moreover, the property tax emerges as a key financing instrument for capital operation and maintenance expenses. By choosing the most appropriate mix of financing instruments and focusing on wise investments, cities can design comprehensive financing for all types of urban transport projects using multi level innovative revenue sources that promote efficient pricing schemes, increase overall revenue, strengthen sustainable transport and cover capital investments, operation and maintenance for all parts of a public transport system from the sidewalk to the subway.

The New York City Subway System Ronald A. Reis, 2009. Teeming with a population of 3.5 million at the end of the 19th century, the island of Manhattan couldn't meet the city's demand for rapid transit with its horse drawn trolleys and elevated train lines. New York City needed a subway system. After four years of digging and diverting miles of utilities and tunneling under the Harlem River, the city's residents celebrated a new era in mass transit on October 27, 1904, with the opening of a nine mile subway route. In the century to come, the New York subway would grow and expand to a system that runs 24 hours a day, seven days a week, with 6,400 cars, 468 stations, a daily ridership of 4.5 million and 842 miles of track, longer than the distance from New York to Chicago. Politics, graffiti and unbelievable construction challenges combined to make the building and running of the New York subway system one of the America's greatest civic undertakings.

American War Machine Peter Dale Scott,2010-11-16 This provocative thoroughly researched book explores the covert aspects of U S foreign policy Prominent political analyst Peter Dale Scott marshals compelling evidence to expose the extensive growth of sanctioned but illicit violence in politics and state affairs especially when related to America s long standing involvement with the global drug traffic Beginning with Thailand in the 1950s Americans have become inured to the CIA s alliances with drug traffickers and their bankers to install and sustain right wing governments The pattern has repeated itself in Laos Vietnam Italy Mexico Thailand Nigeria Venezuela Colombia Peru Chile Panama Honduras Turkey Pakistan and now Afghanistan to name only those countries dealt with in this book Scott shows that the relationship of U S intelligence operators and agencies to the global drug traffic and to other international criminal networks deserves greater attention in the debate over the U S presence in Afghanistan To date America s government and policies have done more to foster than to curtail the drug trade The so called war on terror and in particular the war in Afghanistan constitutes only the latest chapter in this disturbing story
