Education in Singapore Yew-Jin Lee, 2022-04-06 This edited book is a comprehensive resource for understanding the history as well as the current status of educational practices in Singapore. It is a one-stop reference guide to education and educational issues concerns here. There are three sections. Part 1 provides a sectorial overview of how education has been organized in this country such as preschool, special needs, primary and secondary and adult education divisions. In Part 2, contributors critically delve into issues and policies that are pertinent to understanding education here such as underachievement, leadership, language, education assessment and meritocracy to question what Part 1 might have taken for granted. Part 3 contains the largest number of contributors because it offers a scholarly examination into specific subject histories. This section stands out because of the comparative rarity of its subject matter: history of Physical Education, Art, Music, Geography, Education etc in Singapore.

Revamping Architectural Education Rajesh Sharma, 2018-06-08 The book that you hold in your hands is a treasure trove of ideas to set into motion a new generation of learning for architects. As the author is a practitioner of this technology called architecture, he has often felt that globally it is the last field of knowledge that still displays vestiges of a holistic renaissance attitude of mind. It has not fallen victim to our global love for economic development above all other considerations and is not always a handmaiden of consumerist culture. Architects are somewhat obsessed with form. Despite this or in spite of it, they combine and harmonize the field of applied arts with the sciences, the attitudes of engineering optimization with the expression of the visual arts, covering subjects as diverse as chemistry and history. India is possibly the world's largest future market for private sector architects today. If we do not adapt our architectural practice starting with our architectural teaching practices, we run the clear and present danger of becoming extinct in the race for economic development and urbanization which is truly sustainable, resilient, sufficient and equitable. In reading this little gem of a book, the author would urge the reader to look beyond formulae and descriptions and generate an agenda for reform beyond just the curriculum and towards transformation. As Indian society struggles to understand its architects, the profession owes a duty to itself to remain relevant to social needs and aspirations to create a nation of our dreams. And the author hopes that the beginning of that agenda can be found in the pages of this book interpreted by every reader individually.
