Healthy Eating and Physical Activity in Out-of-School Time Settings Jean L. Wiecha, Georgia Hall, 2015-01-07 The evidence base of the impact and effectiveness of healthy eating and physical activity interventions in the out of school setting is continuing to emerge By sponsoring this special issue the National AfterSchool Association provides a platform for the sharing of a range of research studies that can inform and shape current discussion of best policies and practices to support child and youth wellness The body of work presented in this issue adds considerably to our knowledge of healthy eating and physical activity interventions in out of school programs and highlights the substantial contribution towards childhood obesity prevention that we envision from our field This is the 143rd volume of New Directions for Youth Development the Jossey Bass quarterly report series dedicated to bringing together everyone concerned with helping young people including scholars practitioners and people from different disciplines and professions

Pedagogical Content Knowledge in STEM Stephen Miles Uzzo, Sherryl Browne Graves, Erin Shay, Marisa Harford, Robert Thompson, 2018-10-25 This volume represents both recent research in pedagogical content knowledge PCK in science technology engineering and math STEM as well as emerging innovations in how PCK is applied in practice The notion of research to practice is critical to validating how effectively PCK works within the clinic and how it can be used to improve STEM learning As the need for more effective educational approaches in STEM grows the importance of developing identifying and validating effective practices and practitioner competencies are needed This book covers a wide range of topics in PCK in different school levels middle school college teacher training teacher professional development and different environments museums rural The contributors believe that vital to successful STEM education practice is recognition that

STEM domains require both specialized domain knowledge as well as specialized pedagogical approaches. The authors of this work were chosen because of their extensive fieldwork in PCK research and practice making this volume valuable to furthering how PCK is used to enlighten the understanding of learning as well as providing practical instruction. This text helps STEM practitioners, researchers, and decision makers further their interest in more effective STEM education practice and raises new questions about STEM learning. *The Saturday Evening Post*, 1925

Handbook of Research on Using Educational Robotics to Facilitate Student Learning Papadakis, Stamatios, Kalogiannakis, Michail, 2020-12-05

Over the last few years, increasing attention has been focused on the development of children's acquisition of 21st century skills and digital competences. Consequently, many education scholars have argued that teaching technology to young children is vital in keeping up with 21st century employment patterns. Technologies such as those that involve robotics or coding apps come at a time when the demand for computing jobs around the globe is at an all-time high while its supply is at an all-time low. There is no doubt that coding with robotics is a wonderful tool for learners of all ages as it provides a catalyst to introduce them to computational thinking, algorithmic thinking, and project management. Additionally, recent studies argue that the use of a developmentally appropriate robotics curriculum can help to change negative stereotypes and ideas children may initially have about technology and engineering.

The Handbook of Research on Using Educational Robotics to Facilitate Student Learning is an edited book that advocates for a new approach to computational thinking and computing education with the use of educational robotics and coding apps. The book argues that while learning about computing, young people should also have opportunities to create with computing, which have a direct impact on their lives and their communities. It develops two key dimensions for understanding and developing educational experiences that support students in engaging in computational action: 1) computational identity, which shows the importance of young people's development of scientific identity for future STEM growth, and 2) digital empowerment, to instill the belief that they can put their computational identity into action in authentic and meaningful ways. Covering subthemes including student competency and assessment, programming education, and teacher and mentor development, this book is ideal for teachers, instructional designers, educational technology developers, school administrators, academicians, researchers, and students.

Not Just Play Meryl Nadel, Susan Scher, 2019-05-20

Camps often provide children with a first taste of independence and freedom from the restrictions of home and school while offering a milieu full of opportunities for psychosocial development, creative interaction, and mutual aid. Though summer camps have simultaneously given current and future social workers educational practice research and theory development opportunities as they direct staff, attend, and provide supervision, the field has received limited scholarly attention. *Not Just Play* focuses on the relationship between social work and the summer camp movement and provides a comprehensive treatment of this underappreciated area of practice. Social workers and camp professionals will value the many advantages and connections explored in the volume, which also incorporates case vignettes and core

scholarly research The text offers readers a multifaceted examination of social work and summer camp that broadens their professional and scholarly perspective

Building Healthy Communities for Positive Youth Development Michael J. Nakkula, Karen C. Foster, Marc Mannes, Shenita Bolstrom, 2010-07-23 It is a great pleasure to offer this volume from Michael J. Nakkula, Karen C. Foster, Marc Mannes, and Shenita Bolstrom as the latest in the Search Institute Series on Developmentally Attentive Community and Society Its importance to the series and this field of inquiry and practice is readily evident in its title Building Healthy Communities for Positive Youth Development Since the early 1990s Search Institute has invited and encouraged communities of all shapes and sizes to use its framework of Developmental Assets and principles of asset building to create strong vibrant and welcoming communities for children and youth We have operated largely at the grassroots level encouraging innovation and adaptation around a shared vision rather than proposing a program or model for replication We seek to learn as much from the communities as they learn from us This book offers in depth case studies of what happened in eight diverse communities that took up our invitation In them we see a wide array of strategies and approaches that on the surface seem to have little coherence But as Nakkula and colleagues found underlying each of these distinct efforts was a deep commitment to transforming the social norms of community life to more effectively attend to young people's healthy development throughout the first two decades of life There have been many ambitious efforts aimed at comprehensive community change on behalf of young people
