Summer Son English Edition:

Felony and the Guilty Mind in Medieval England Elizabeth Papp Kamali, 2019-08 Explores the role of criminal intent in constituting felony in the first two centuries of the English criminal trial jury **Articulating British Classicism** Elizabeth McKellar, 2017-07-05 Whereas the past decades have seen a profound reconsideration of eighteenth century visual culture the architecture of that century has undergone little evaluation Its study unlike that of the early modern period or the twentieth century has continued to use essentially the same methods and ideas over the last fifty years Articulating British Classicism reconsiders the traditional historiography of British eighteenth century architecture as it was shaped after World War II and brings together for the first time a variety of new perspectives on British classicism in the period Drawing on current thinking about the eighteenth century from a range of disciplines the book examines such topics as social and gender identities colonialization and commercialization notions of the rural urban and suburban as well as issues of theory and historiography Canonical constructions of Georgian architecture are explored including current evaluations of the continental intellectual background the relationship with mid seventeenth century Stuart court classicism and the development of the subject in the twentieth century *The Norman Conquest in English History* George Garnett, 2020-12-02 The Norman Conquest in English History Volume 1 A Broken Chain pursues a central theme in English historical thinking over seven centuries Covering more than half a millennium this first volume explains how and why the experience of the Norman Conquest prompted both an unprecedented campaign in the early twelfth century to write or create the history of England and to excavate and fabricate pre Conquest English law Garnett traces the treatment of the Conquest in English historiography legal theory and practice and political argument through the middle ages and early modern period examining the dispersal of these materials from libraries after the dissolution of the monasteries and the attempts made to rescue edit and print many of them in the late sixteenth and early seventeenth centuries These preservation efforts enabled the Conquest to become still more contested in the constitutional cataclysms of the seventeenth century than it had been in the eleventh and twelfth The seventeenth century resurrection of the Conquest will be the subject of a second volume *Architecture in Britain, 1530 to 1830* John Summerson, John Newenham Summerson, Sir, 1993-01-01 The author charts the development of architectural theory and practice from Elizabeth I to George IV Questions of style technology and the social framework are resolved as separable but always essential components of the building worlds *Berthold Lubetkin's Highpoint II and the Jewish Contribution to Modern English Architecture* Deborah Lewittes, 2018-05-15 In 1935 the Russian born Jewish architect Berthold Lubetkin and his firm Tecton designed Highpoint a block of flats in London which Le Corbusier called revolutionary Three years later Lubetkin completed a companion design Yet Highpoint II felt very different and the sense that the ideals of modernism had been abandoned seemed hard to dispute Had modern architecture failed to take root in England This book challenges the belief that English architecture was on hiatus during the 1930s Using Highpoint II as a springboard Deborah

Lewittes takes us on a journey through the defining moments of modern English architecture the high points of the period surrounding Highpoint II Drawing on Lubetkin s work and his writings the book argues that he advanced influential lasting theories which were rooted in his design for Highpoint II Lubetkin s work is explored within the context of wider Jewish emigration to London during the interwar years as well as the anti-Semitism that pervaded Britain during the 1930s As Lewittes demonstrates this decade was anything but quiet Providing a new perspective on twentieth century English architecture this book is of interest to students and scholars in architectural history urban studies Jewish studies and related fields

The birth of modern London ,2021-02-23 The period 1660 1720 saw the foundation of modern London The city was transformed post Fire from a tight warren of medieval timber framed buildings into a vastly expanded regularised landscape of brick houses laid out in squares and spacious streets This work for the first time examines in detail the building boom and the speculative developers who created that landscape It offers a wealth of new information on their working practices the role of craftsmen and the design thinking which led to the creation of a new prototype for English housing The book concentrates on the mass produced houses of the middling sort which saw the adoption of classicism on a large scale in this country for the first time McKellar shows however that the new city maintained a surprising degree of continuity with existing patterns of urban use and traditional architecture The book presents the late seventeenth and the early eighteenth century as a distinct phase in London s architectural development and offers a radical reinterpretations of the adoption of Renaissance styles and ideas at the level of the everyday challenging conventional interpretations of their use and reception in this country

Touching the City Timothy Makower,2014-10-08 Scale in cities is relative and absolute It has the ability to make us feel at home in the world or alien from it connected or disconnected Both large and small scale in cities can be beautiful both are right neither is wrong Whilst accepting that prescription is no answer getting the scale right at an intuitive and sensual level is a fundamental part of the magic of architecture and urban design Touching the City explores how scale is manifested in cities exploring scale in buildings in the space between them and in their details It asks how scale makes a difference Travelling from Detroit to Chandigarh via New York London Paris Rome and Doha Tim Makower explores cities with the analytical eye of a designer and with the experiential eye of the urban dweller Looking at historic cities he asks what is good about them what can we learn from the old to inform the new The book zooms in from the macro scale of surfing Google Earth to micro moments such as finding fossils in a weathered wall It examines the dynamics and movement patterns of cities the making of streets and skylines the formation of thresholds and facades and it also touches on the process of design and the importance of drawing As the book s title Touching the City suggests it also emphasises the tactile that the city is indeed something physical something we can touch and be touched by alive and ever changing

Peter Stent, London Printseller Alexander V. Globe,2011-11-01 From the 15th century on engravings influenced European culture almost as profoundly as books Like stained glass windows in the Middle Ages or television today popular prints were

designed to reach even the lowest orders of society In the 17th century Peter Stent whose shop stood outside Newgate was England's most prolific seller of popular prints maps and copybooks to the working and rising middle classes His inventory of copper plates reflected the shifts of popular tastes during this period and commented directly on the turbulent events of the day In documenting Stent's output Alexander Globe studied the printsellers advertising catalogues as external controls for reconstructing inventories as well as indices to contemporary tastes From these and other contemporary sources Globe cites every engraving and book attributable to Stent breaking down the material into types portraits maps miscellaneous sheets and books including works on handwriting politics natural history anatomy costume and architecture References and additions are made to the catalogues of Donald Wing and A M Hind Globe takes the history of engraving beyond Hind by including prints from the Commonwealth Protectorate and early Restoration periods Eight appendices supplement the catalogue information They provide evidence for print identification discuss paper sizes and list Stent's artists suppliers and business associates All the collections in which Stent items may be found are named The volume concludes with a bibliography and indices of subject as well as post 17th century authors Globe's introduction to Stent's work is concerned with the social political and economic conditions leading to the emergence of a popular printseller who catered to a different clientele from that usually studied by art historians Stent's career illustrates the mid 17th century commercial revolution which saw the artisan's customers change from the wealthy leisure class to the worker who wanted mass produced cheap goods Drawing on material in a hundred libraries and museums around the world the catalogue describes over fifteen hundred engravings including 319 sheets and five books of portraits 42 maps 102 miscellaneous prints and sets with religious classical heraldic and satirical subjects and 86 books on handwriting politics military training natural history figure sketches costume architecture and ornament Richly illustrated with 319 plates Peter Stent will prove valuable not only to print dealers art historians museums and libraries but also to social cultural and political historians *The Fall and Rise of the Stately Home* Peter Mandler, 1997-01-01 Challenging the prevailing view of a modern English culture besotted with its history and aristocracy Mandler portrays instead a continuously changing society where both intellectual and popular attitudes have only recently turned to admiration The Oxford Handbook of the Age of Shakespeare R. Malcolm Smuts, 2016-06-30 The Oxford Handbook of the Age of Shakespeare presents a broad sampling of current historical scholarship on the period of Shakespeare's career that will assist and stimulate scholars of his poems and plays Rather than merely attempting to summarize the historical background to Shakespeare individual chapters seek to exemplify a wide variety of perspectives and methodologies currently used in historical research on the early modern period that can inform close analysis of literature Different sections examine political history at both the national and local levels relationships between intellectual culture and the early modern political imagination relevant aspects of religious and social history and facets of the histories of architecture the visual arts and music Topics treated include the emergence of an early modern

public sphere and its relationship to drama during Shakespeare's lifetime the role of historical narratives in shaping the period's views on the workings of politics attitudes about the role of emotion in social life cultures of honour and shame and the rituals and literary forms through which they found expression crime and murder and visual expressions of ideas of moral disorder and natural monstrosity in printed images as well as garden architecture **Catalog of Copyright Entries**

The British Library General Catalogue of Printed Books to 1975 British Library (London),1986 **A Wealth of Buildings: Marking the Rhythm of English History** Richard Barras,2016-09-23 This two

volume book explores how the great buildings of England bear witness to a thousand years of the nation's history In every age investment in iconic buildings reaches a climax when the prevailing mode of production is operating most effectively surplus wealth is most plentiful and the dominant class rules supreme During such periods of stability and prosperity the demand for new buildings is strong structural and stylistic innovations abound and there is fierce competition to build for lasting fame Each such climax produces a unique vintage of hegemonic buildings that are monuments to the wealth and power of those who ruled their world This second volume presents three case studies of iconic building investment from the eighteenth century to the present day During the eighteenth century the wealth of the great landed estates funded the golden age of country house building by aristocracy and gentry During the nineteenth century the Industrial Revolution unleashed an unprecedented wave of infrastructure investment and civic building by the ascendant capitalist class Since the late twentieth century the power of global financial capital has been symbolized by the relentless rise of city centre office

towers A final chapter argues that these different forms of hegemonic building are a physical manifestation of the underlying rhythm of English history

Inner empire Daniel Maudlin, Alex Bremner, 2024-08-06 Inner Empire explores the impact of imperial cultures on the landscapes and urban environments of the British Isles from the sixteenth century through to the twentieth century It asserts that Britain's four hundred year entanglement with global empire left its mark upon the British Isles as much as it did the wider world Buildings stood as one of the most conspicuous manifestations of the myriad relationships that Britain maintained with the theory and practice of colonialism in its modern history Divided into two main sections the volume's content considers internal colonisation and its infrastructures of control order and suppression alongside wider relationships between architecture the imperial economy and cultural identity Taken together the essays in this volume present for the first time a coherent analysis of the British Isles as an imperial setting understood through its buildings spaces and infrastructure
