Department for International Development's bilateral support to primary education Great Britain: Parliament: House of Commons: Committee of Public Accounts, 2010-12-23 The coalition Government has committed to increasing the Department for International Development's total aid spending from 7.8 billion in 2010-11 to 11.5 billion in 2014-15 The Department aims to improve and expand state primary education focusing on sub-Saharan Africa and Asia It works largely by influencing and financing developing country governments to pursue Millennium Development Goals The Committee supports these aims but expresses concerns about its ability to assess the value for money of its spending Fourteen of the 22 countries the Department supports are on track to meet Millennium Development Goals for primary enrolment by 2015 The

Committee also expresses concern that the Department cannot adequately attribute impacts to its spending and its influence. Even for its largest programmes such as India it typically contributes a low proportion of the country's education spend. For the Committee the Department needs to place value for money as the primary focus when allocating resources or assessing the performance of its education programmes. It needs to focus on how many children attend and complete primary education along with the literacy and numeracy they achieve.

Interim guidance for country validation of viral hepatitis elimination, 2021-06-08

In 2016 the World Health Assembly adopted the Global Health Sector Strategy GHSS on viral hepatitis. The GHSS called for elimination of viral hepatitis B and C infection as a public health problem defined as a 90% reduction in incidence, 95% for HBV and 80% for HCV, and 65% reduction in mortality by 2030 compared with the 2015 baseline. A broad range of countries have now developed national viral hepatitis plans and several countries also requested guidance from the World Health Organization WHO on the establishment of global criteria for measuring elimination of viral hepatitis and a standardized process for validation of elimination. WHO has developed this interim guidance for countries and other stakeholders seeking validation of elimination of viral hepatitis as a public health problem with a specific focus on hepatitis B virus HBV and hepatitis C virus HCV. It provides a global framework for the processes and standards for validation of elimination and overall proposes the use of absolute impact targets to validate elimination at the national level instead of although equivalent to the relative reduction targets originally defined in the 2016 GHSS in combination with a set of programmatic targets.

Guide to International Transfer Pricing Dr A. Michael Heimert, T.J. Michaelson, 2018-10-26

The pricing of goods, services, intangible property and financial instruments within a multi-divisional organization, particularly in regard to cross-border transactions, has emerged as one of the most contentious areas of international tax law. This is due in no small measure to the rise of transfer pricing regulations as governments seek to stem the flow of their tax revenue from their jurisdictions. This thoroughly practical work provides guidance on an array of critical transfer pricing issues. The guide's relevance is further enhanced by the inclusion of country chapters covering domestic transfer pricing issues in a variety of key national jurisdictions.
