de los datos La Criminología en particular y las ciencias sociales en general van alejándose del individuo puro como centro del universo. Ahora sabemos que los individuos responden de maneras muy distintas al cambiar sus ambientes y sus situaciones durante un día normal. El trabajo de Roger Barker en el año 1950 sobre los marcos del comportamiento se aplica ahora a datos reales. Pues esa es la clave de este progreso: una teoría más práctica enfocada y de análisis de datos y patrones para determinar qué se puede hacer. Estamos asistiendo a una acumulación de conocimiento y comprensión del delito y avanzaremos más si prestamos mayor atención al delito si lo relacionamos con las actividades no delictivas si usamos análisis espacio-temporales sencillos y otros análisis más avanzados para sintetizar los datos y especialmente si prestamos menos atención a las grandes teorías y más a las de alcance medio.
