

Top ten tips for your TOK essay

IB Diploma students all over the world are facing the pending deadline of the TOK essay. TOK is not simply about assessment, but this doesn't mean that you shouldn't think strategically about the process and leverage the opportunities for success. John Spiegel offers some strategies to make the most of the experience.

1 Start early

While the TOK essay is a relatively short piece of work, don't let this fool you into thinking that it is easy. Your first ideas are rarely the best — so start thinking now.

2 Writing to think...

There is a difference between writing to think and writing to communicate. All too often students assume that thinking and communicating are the same process. When developing a presentation, as you open up PowerPoint before you even know what you are going to say! When writing an essay, do you start with a blank page and think 'what is my introduction going to be'?

The effort that goes into developing your ideas is different from the subsequent effort that goes into shaping the essay that will be assessed. Both require writing, but that doesn't mean they are the same activity.

How you start gets to the end of an essay and suddenly thought, 'There's a problem, why didn't I think of that three pages ago?' If you're anything like me, getting down your ideas will help you clarify them while writing. You can't present your ideas until you know what they are, but sometimes you don't know what they are when it is time to start writing. To develop them I usually need to start writing about a topic on which I am knowledgeable, saying the things I do not yet know out loud. I can read material through the 'writers' block' and start putting words on paper. I don't have to decide where it will go in the final essay, or how it fits into the larger picture, until the other ideas start to go.

3 ...or writing to communicate?

Keeping this distinction in mind, how you have written your ideas down and realised that 'what' matters, you can go back and shift what around. You can easily answer the question 'What needs to go into my introduction because you should have the points already your ideas in front of you.

By using your word processor's 'Outline' function before you can usually find under the 'Outline' menu to organise your ideas. It allows you to break up ideas into new headings and new paragraphs, hide them when you're done with that part, and expand them later when you need to. It also allows you to move ideas around when you need to keep thinking about the most effective order.

When it comes to communicating, you can start to fit the ideas together, perhaps cutting out the headings and offering that sometimes between ideas (though headings can still be appropriate).

4 Brainstorm each title

Don't commit yourself to any one title until you have had a chance to explore them all. One a clever way to organise this, thinking about what examples to use, what the conceptual terms are, writing one or two, and what areas of knowledge and ways of knowing (WOKs) might be helpful. The idea you thought was going to be the best might turn out to be difficult, or even wrong.

5 Develop a clear argument

The biggest single mistake of most of the hundreds of essays I examine each year is that they don't have a clear argument. They are more accounts of everything the student knows about the topic than essays. Your essay needs to take a position that is a clear response to the title, not just a list of ideas that occurred to you during the process of writing.

6 Remember the examiner

Your examiner is a real thing, something human being, and a happy examiner is a charitable examiner.

- Examiners read the essays at a computer, so format your essay so it's easier to read on screen. Use 12 point font, normalised margins and double spacing.

- Don't be afraid to tell the examiner what you are doing in the essay. Phrases like 'I would claim that I will now examine...' or 'Having established the point, I now turn to it to develop my argument by...' might be clumsy in terms of style but they help the examiner follow the greater clarity.

- When you start to write what your examiner's examiner specialty is, think about whether your argument and examples will be convincing to someone who teaches that subject. Talk to another teacher about your ideas to see if they think they are rigorous enough (though only your TOK teacher can read your draft essay).

7 Use examples well

Examples are the real thing here of a good TOK essay. Without them your essay will just float around in the world of abstraction. Your ideas might be true, but you need to prove that they are through analysis of real life, concrete examples.

Never use 'hypothetical examples' — TOK is about knowledge in the real world. Make sure that you develop the examples well — don't just identify an example, tell the examiner why it's a good example, what it shows and how it shows it. Your examiner might know a lot about your topic but nothing at all, so you need to make the examples convincing.

Good historic examples. People have known the Earth was round since the sixth century BC. Galileo couldn't tell his students with the church, but this led to general early thousands of other students. Search for examples that others might not have thought of.

8 Reference properly

The TOK essay is not a research project, so you don't need to spend hours in the library, but it is still a piece of academic writing. An effective argument is presented respectfully and this includes full, properly formatted referencing. If the examiner thinks you have referenced something incorrectly the end of it, they can just give up a mark and move on to the next one. Good referencing shows them that you are paying attention to detail, and essay that pay attention to detail are generally good essays.

9 Show your teacher

Teachers can only look through so many essays, and they are not allowed to edit it for you, but they can give you a sense of whether you are on the right track and have a discussion with you about the ideas you have presented.

10 Remember the assessment criteria

Read through the assessment criteria for the essay and keep them in hand while you are writing. Remember points 3 and 7 above present you with a way that meets the requirements of the criteria.
