10	

What phase change is most likely occurring between minutes 6 and 8?

- A. Freezing
- B. Condensation
- C. Melting
- D. Boiling

Rationale: The temperature remains constant at 100°C while the substance changes from liquid to gas (boiling).

Which two statements best describe what has occurred between minutes 6 and 8?

- A. The substance melted.
- B. The substance began to freeze.
- C. The substance changed from a gas to a liquid.
- D. The temperature stayed constant.
- E. The liquid turned into a solid.

Rationale: The temperature drops below 0°C, the freezing point of water. Freezing occurs as the substance moves from liquid to solid.

Standard: 5.PS1.1 - Analyze and interpret data from observations and measurements of the physical properties of matter to explain phase changes between a solid, liquid, or gas.

Carole Marsh, 2016-04-01. Exploring Tennessee through Project Based Learning includes 50 well thought out projects designed for grades 3-5. In assigning your students projects that dig into Tennessee's geography, history, government, economy, current events, and famous people, you will deepen their appreciation and understanding of Tennessee while simultaneously improving their analytical skills and ability to recognize patterns and big picture themes. Project based learning today is much different than the craft-heavy classroom activities popular in the past. Inquiry, planning, research, collaboration, and analysis are key components of project based learning activities today. However, that doesn't mean creativity, individual expression, and fun are out. They definitely aren't. Each project is designed to help students gain important knowledge and skills that are derived from standards and key concepts at the heart of academic subject areas. Students are asked to analyze and solve problems, to gather and interpret data, to develop and evaluate solutions to support their answers with evidence, to think critically in a sustained way, and to use their newfound knowledge to formulate new questions worthy of exploring. While some projects are more complex and take longer than others, they all are set up in the same structure. Each begins with the central project, driving questions, proceeds through research, and supportive questions. The student chooses a presentation option and ends with a broader view inquiry. Rubrics for reflection and assessments are included too. This consistent framework will make it easier for you to assign projects and for your students to follow along and consistently meet expectations. Encourage your students to take charge of their projects as much as possible. As a teacher, you can act as a facilitator and guide. The projects are structured such that students can often work through the process on their own or through cooperation with their classmates.
