European Dept.,2014-05-28 This 2014 Article IV Consultation outlines that the growth of the Swiss economy has gathered pace but inflation remains close to zero The recovery is expected to continue and inflation should rise gradually although the output gap will progressively close The fiscal position is healthy with a broadly neutral stance projected for 2014 Despite improved market confidence toward the euro area and tapering in the United States the exchange rate has remained close to the floor The authorities have taken several measures to contain risks including raising the countercyclical capital buffer and adopting prudential measures to tighten lending standards and conditions Estimating the Demand for Reserve Assets Across Diverse Groups Ms.Rina Bhattacharya,Katja Mann,Ms.Mwanza Nkusu,2018-03-09 This paper takes a fresh look at the determinants of reserves holding with the aim of highlighting similarities and differences in the motives for holding reserves among emerging markets EMs advanced economies AEs and low income countries LICs We apply two panel estimation techniques fixed effects FE and common correlated effects pooled mean group CCEPMG FE regression results suggest that precautionary savings motives both current account and capital account related are generally the most important determinants of reserves holding across country groups and that their importance has increased for AEs and LICs since the global financial crisis while receding for EMs Mercantilist motives matter mostly for EMs Intertemporal motives have been gaining importance everywhere over time The CCEPMG results confirm the importance of precautionary motives and suggest that current account motives matter only for EMs and LICs and capital account motives matter for all groups while being more important for EMs in both the short and long runs The CCEPMG results also point to the importance of taking into account unobserved common factors that affect coefficient estimates and the dynamic process through which reserves adjust to changes At about 0.6 the speed of adjustment to the long run equilibrium implies that more than half of the gap between actual and desired reserve holdings is closed within a year **Handbook on Good Treaty Practice** Jill Barrett,Robert

Employing scientific explanations and hard data this book shows why coal is such a problem how the pro coal forces got to be so powerful and how those forces might be defeated through political activism Coal provided the energy to build modern civilization This energy source raised standards of living multiplied the earth s population and enabled people in developed countries to enjoy leisure time Today we know that if we burn all the coal available climate change will continue to increase But the use of coal isn t purely an environmental issue political and economic forces are also at play This book examines the politics and environmental impact of coal production and distribution presenting a clear point of view that we must shift away from coal use backed by hard data and supplying specific prescriptions for opposing and regulating the coal industry John C Berg explains how ending the burning of coal and of oil and natural gas is a political problem rather than a technical one explodes the clean coal myth providing scientific documentation of how burning coal emits more greenhouse gases per unit of energy than any other fuel and describes how controlling coal use in the United States will also restore the possibility

of a meaningful international climate agreement Additionally readers will understand the critical importance of activism from local to international in spurring government regulation to control the coal industry which can only be defeated politically

make end users feel doubtful about accessing digital content through streaming It is uncertain whether exercising the right of reproduction is appropriately suited for streaming given the ambiguities of embodiment and scope of substantial part Conversely the fair dealing defence in Australia cannot be used aptly to defend end users acts of streaming digital content because end users who use streaming to access digital content can rarely rely on the defence of fair dealing for the purposes of criticism or review news reporting parody or satire or research or study When considering a temporary copy exception end users are at risk of being held liable for infringement when using streaming to access a website that contains infringing digital content even if they lack any knowledge about the content s infringing nature Moreover the grey areas in circumventing geo blocking have made end users hesitant to access websites through streaming because it is not clear whether technological protection measures apply to geo blocking End users have a severe lack of knowledge about whether they can use circumvention methods such as virtual private networks to access streaming websites without being held liable for copyright infringement Despite the intricacies between copyright and access to digital content the recently implemented website blocking laws have emboldened copyright owners while suppressing end users access to digital content This is because the principles of proportionality and public interest have been given less attention when determining website blocking injunctions *Congressional Record* United States.
