Abstract

A template is provided for writing paper reviews or term papers. Terminology relevant to writing a paper is also defined. For example, an *abstract* is a fifty to two hundred word summary of your paper that appears at the beginning of the paper.

1. Introduction

The introduction should define the problem you are studying, discuss the history of the problem and state its importance in the field. Applications of the problem can be discussed and basic examples should be given to illustrate the concepts, using figures if possible. Basic terminology should be defined and explained.

In the introduction, and throughout your paper, it is most important to cite the sources of your information. Sources may include textbooks, magazine or newspaper articles, web sites, and journal articles. Most journal articles will follow a format similar to that espoused in this template, including the manner in which sources are cited and referenced. Journals are the best source of information for two main reasons: (1) journals are archived, meaning they are kept in permanent collections in libraries (web sites are an example of sources that are likely not permanent); (2) journal articles are refereed, meaning the information they contain has been read and approved by independent reviewers. To cite a source, you typically use “[]” notation. For example, one of the most cited sources in the field of computer science is the text by Garey and Johnson [1]. In this case, Garey and Johnson are the authors. Sometimes, we will omit the authors’ names and just give the citation. For example, a great deal of information NP-completeness can be found in [1]. It is important that you give up-to-date references where possible. That is, if you are writing a paper on the history of the integrated circuit and your most recent reference is 1965, it is likely that you have not done a thorough job of researching your topic.

2. Background

In some cases, you may need to divide the introductory material in your paper into two sections. Oftentimes, a second section called the “Background” section is used. In the Background section, additional terms are defined and more historical information, such as previous results and a review of related papers, is given. It is in the Introduction and Background sections that you must ensure that your reader understands the problem and the terminology as well as show the reader that you have done your homework, in terms

How to Write and Publish a Scientific Paper Robert A Day,Barbara Gastel,2006-04-26 Guide on writing and submitting a scientific paper for graduates to professionals *Assessing and Improving Student Writing in College* Barbara E. Walvoord,2014-07-07 Step by step guidance for shaping better writers while keeping faculty workloads manageable

Effective communication is a critical skill for many academic disciplines and careers and so colleges and universities and their faculty members are rightfully committed to improving student writing across the curriculum. Guiding and assessing student writing in classrooms, general education and departments takes knowledge, planning and persistence, but it can be done effectively and efficiently. Written in the concise, accessible style, Barbara Walvoord is known for *Assessing and Improving Student Writing in College: A Guide for Institutions, General Education Departments, and Classrooms*. The book offers administrators, program chairs, general education leaders and classroom instructors the guidance they need. The book provides concrete suggestions for how to articulate goals for student writing, measure student writing, improve student writing, document that improvement. The book begins by addressing four basic concepts: what we mean by writing, what we mean by good writing, how students learn to write and the purposes of assessment. Next, Walvoord explains the various approaches and methods for assessing writing, urging a combination of them adapted to the institution's purposes and political context. After this introduction, successive chapters offer realistic, practical advice to institution-wide and general education leaders, department members and classroom instructors. Walvoord addresses issues such as how to engage faculty, how to use rubrics, how to aggregate assessment information at the department and institutional levels and how to report assessment information to accreditors. The chapter for classroom instructors offers practical suggestions: how to add more writing to a course without substantially increasing the grading load; how to construct writing assignments; how to make grading and responding more effective and time efficient; how to address grammar and punctuation; and how to support students whose native language is not English. The book also includes four helpful appendices: a taxonomy of Writing Across the Curriculum (WAC) and Writing in the Disciplines (WID) programs; sample outlines for faculty development workshops; a student survey on teaching methods instructors can use to inform their choices in the classroom; and a student self-check cover sheet designed to help students take ownership of their own learning and responsibility for turning in complete, correct assignments. Practical, step-by-step guidance for each point in the assessment and improvement process creates a cohesive institution-wide system that keeps students, faculty and administrators on the same page.

Enhancing Basic Research and Writing Skills' 2004 Ed. , Thesis & Dissertation Writing Rivera, Maximiano.M.Jr.,2007 *Writing Your Doctoral Dissertation* Rita S. Brause,2012-10-02

Increasing numbers of adults are enrolling in doctoral programmes but their earlier college lives often do not prepare them for the rules of the academic game. Many have no idea what a dissertation looks like, how it gets that way or what options are available to them. This book is a practical guide for students who need help in progressing from the decision to write a dissertation to the planning, writing and defending of it. It includes samples of proposals and dissertations that have been accepted and data drawn from a number of sources including focus groups with doctoral students and graduates and responses to an open-ended questionnaire from doctoral students across the United States.
