Territorialism Studio Report:

The Urbanisation of the Sea Nancy Couling, Carola Hein, 2020-12-02 The book tells the story of the sea land continuum based on the case of the North Sea one of the world's most industrialised seas in which the Netherlands plays a central role. The space of the North Sea is almost fully planned and has been loaded with the task of increased economic production from new and traditional maritime sectors. At the same time it has been emptied of cultural significance. Through diverse projects from academia, art, literature and practice from analysis to design, the book explores synergies for designing this new spatial realm. Port city expert Carola Hein, professor of the history of architecture, urban planning at Delft University of Technology, and Nancy Couling, associate professor at the Bergen School of Architecture and researcher of the urbanised sea, combine forces with interdisciplinary experts to guide the reader through this complex and fascinating topic. **Reorienting Ozu**

Jinhee Choi, 2017-12-05 Considered by many film critics as the master of Japanese Cinema, director Ozu Yasujiro still inspires filmmakers both within and outside of Japan. The Cinema of Ozu presents new perspectives on Ozu's aesthetic sensibility and his influence on global art cinema directors. The Routledge Handbook of Regional Design Michael Neuman, Wil

Zonneveld, 2021-04-15 The Routledge Handbook of Regional Design explores contemporary research, policy and practice that highlight critical aspects of strategy making, planning and designing for contemporary regions, including city regions, bioregions, delta regions and their hybrids. As accelerating urbanization and globalization combine with other forces such as the demand for increasing returns on investment, capital migration and innovation, they yield cities that are expanding over ever larger territories. Moreover, these polycentric city regions themselves are agglomerating with one another to create new territorial mega regions. The processes that beget these novel regional forms produce numerous and significant effects, positive and negative, that call for new modes of design and management so that the urban places and the lives and well-being of their inhabitants and businesses thrive sustainably into the future. With international case studies from leading scholars and practitioners, this book is an important resource not just for students, researchers and practitioners of urban planning but also for policy makers, developers, architects, engineers and anyone interested in the broader issues of urbanism.

David Sack, 1986-10-31 First published in 1986 this book demonstrates that territoriality for humans is not an instinct but a powerful and often indispensable geographical strategy used to control people and things by controlling area. This argument is developed by analysing the possible advantages and disadvantages that territoriality can provide and by considering why some and not others arise at particular times. Major changes are explored in the relationships between territory and society from primitive times to the present day with special attention to the distinctions between premodern and modern uses of space and territory. Specific analyses of the pre-modern uses of territoriality are provided by the history of the Catholic Church and for the modern context by study of North American political territorial organization and the organization of factory, office and home.

Territoriality and Conflict in an Era of Globalization Miles Kahler, Barbara F. Walter, 2006-04-13

Predictions that globalization would undermine territorial attachments and weaken the sources of territorial conflict have not been realized in recent decades. Globalization may have produced changes in territoriality and the functions of borders but it has not eliminated them. The contributors to this volume examine this relationship, arguing that much of the change can be attributed to sources other than economic globalization. Bringing the perspectives of law, political science, anthropology and geography to bear on the complex causal relations among territoriality, conflict and globalization, leading contributors examine how territorial attachments are constructed, why they have remained so powerful in the face of an increasingly globalized world, and what effect continuing strong attachments may have on conflict. They argue that territorial attachments and people's willingness to fight for territory depends upon the symbolic role it plays in constituting people's identities and producing a sense of belonging in an increasingly globalized world.
