12648 7125 Disciplining Terror Lisa Stampnitzky, 2013-04-18 Since 9 11 we have been told that terrorists are pathological evildoers Yet before the 1970s hijackings assassinations and other acts now called terrorism were considered the work of rational actors Disciplining Terror explains how political violence became terrorism and how this transformation ultimately led to the current war on terror *Conducting Terrorism Field Research* Adam Dolnik, 2013 This book offers a detailed and practically oriented guide to the challenges of conducting terrorist fieldwork The past decade has seen an explosion of research into terrorism However field research on terrorism has traditionally been surrounded by many myths and has been called anything from necessary and crucial to dangerous unethical and impossible While there is an increasing interest among terrorism specialists in conducting such research there is no single volume providing prospective field researchers with a guideline to such work Conducting Terrorism Field Research aims to fill this gap and offers a collection of articles from experienced authors representing different risk groups disciplines methodological approaches regional specializations and other context specific aspects Each contributor provides a road map to their own research describing planning and preparation phases the formalities involved in getting into conflict zones and gaining access to sources The end product is a how to guide to field research on terrorism which will be of much value to terrorism experts and novices alike This book will be of much interest to students and researchers of terrorism studies war and conflict studies criminology IR and security studies **The Handbook of International Crisis Communication Research** Andreas Schwarz, Matthew W. Seeger, Claudia Auer, 2016-06-13 The Handbook of International Crisis Communication Research articulates a broader understanding of crisis communication discussing the theoretical methodological and practical implications of domestic and transnational crises featuring the work of global scholars from a range of sub disciplines and related fields Provides the first integrative international perspective on crisis communication Articulates a broader understanding of crisis communication which includes work from scholars in journalism public relations audience research psychology political science sociology economics anthropology and international communication Explores the topic from cross national and cross cultural crisis communication approaches Includes research and scholars from countries around the world and representing all regions Discusses a broad range of crisis types such as war terrorism natural disasters pandemic and organizational crises Prisons, Terrorism and Extremism Andrew Silke, 2014-02-18 This volume provides an overview of intervention and management strategies for dealing with terrorist and extremist offenders in prisons The management of terrorist and extremist prisoners has long been recognised as a difficult problem in prisons In most countries such offenders are relatively rare but when their numbers increase these prisoners can undermine the effectiveness and safety of the prison system At a global level there is an increasing recognition of the problem of militant jihadi extremists in prison and their ability to recruit new members among other prisoners The numbers of such prisoners are low but growing and as a result prisons are becoming centres of radicalisation indeed in some cases terrorist plots appear to have been based entirely on networks that

were radicalised in prison This volume presents an expertly informed assessment of what we know about terrorists extremists and prison exploring the experience of a wide range of countries and of different political movements Drawing critical lessons from historical case studies the book examines critical issues around management strategies radicalisation and deradicalisation reform risk assessment as well as post release experiences The role that prisoners play in the conflicts beyond the jail walls is also examined with case studies illustrating how prisoners can play a critical role in bringing about a peace process or alternatively in sustaining or even escalating campaigns of violence Written by leading experts in the field this volume will be of much interest to students of terrorism counter terrorism criminology security studies and IR in general
