A unique contribution to the field, it situates computer music in the broad context of its creation and performance across the range of issues from music cognition to pedagogy to sociocultural topics that shape contemporary discourse in the field. Production and distribution of computer music have grown tremendously as a result, and the time is right for this survey of computer music in its cultural contexts. An impressive and international array of music creators and academics discuss computer music's history, present, and future with a wide perspective, including composition, improvisation, interactive performance, spatialization, sound synthesis, sonification, and modeling. Throughout, they merge practice with theory to offer a fascinating look into computer music's possibilities and enduring appeal. **A Revolution in Music** Évelyne Gayou, 2025-02-25 Established in the 1950s by musician and engineer Pierre Schaeffer, the Groupe de Recherches Musicales would become the nerve center for avant-garde artists experimenting with sound and acoustics, as well as the birthplace of a genre of music making enabled by new recording technologies and sound pioneers. Évelyne Gayou herself, a researcher, composer, and producer at the GRM, tells the history of the storied institution through the people, works, technologies, and research developed there. Placing *musique concrète* within a broad historical context extending from the early twentieth-century avant-garde's experiments with noise to the development of techniques in sound recording at the Studio d'Essai in the 1940s and later in sound synthesis, Gayou shows how recording technology made it possible for composers to not only create music from sounds in the world around them but also create acousmatic music, novel sounds without a visible connection to their source. Available in English translation for the first time, this updated edition will be an important resource for readers interested in the pioneering works and techniques of Schaeffer and his contemporaries, as

well as their influence on the makers of new music and the contemporary avant garde
