Zurada, 2016-05-30 The two volume set LNAI 9692 and LNAI 9693 constitutes the refereed proceedings of the 15th International Conference on Artificial Intelligence and Soft Computing ICAISC 2016 held in Zakopane Poland in June 2016 The 134 revised full papers presented were carefully reviewed and selected from 343 submissions The papers included in the first volume are organized in the following topical sections neural networks and their applications fuzzy systems and their applications evolutionary algorithms and their applications agent systems robotics and control and pattern classification The second volume is divided in the following parts bioinformatics biometrics and medical applications data mining artificial intelligence in modeling and simulation visual information coding meets machine learning and various problems of artificial intelligence

16th International Symposium on Advanced Vehicle Control

Giampiero Mastinu, Francesco Braghin, Federico Cheli, Matteo Corno, Sergio M. Savaresi, 2024-10-03 This open access book highlights the latest advances innovations and applications in the field of vehicle systems dynamics and control as presented by leading international researchers at the 16th JSAE International Symposium on Advanced Vehicle Control AVEC held at Politecnico di Milano Milan Italy on September 2 6 2024 It covers a diverse range of topics such as vehicle dynamics theory steering brake tire suspension chassis control powertrain electrified vehicles stability enhancement systems driver vehicle systems advanced driver assistance systems and automated driving systems driving simulator dynamics and control The contributions which were selected by means of a rigorous international peer review process present a wealth of exciting ideas that will open novel research directions and foster multidisciplinary collaboration among different specialists

Stream Data Mining: Algorithms and Their Probabilistic Properties Leszek Rutkowski, Maciej Jaworski, Piotr Duda, 2019-03-16 This book presents a unique approach to stream data mining Unlike the vast majority of previous approaches which are largely based on heuristics it highlights methods and algorithms that are mathematically justified First it describes how to adapt static decision trees to accommodate data streams in this regard new splitting criteria are developed to guarantee that they are asymptotically equivalent to the classical batch tree Moreover new decision trees are designed leading to the original concept of hybrid trees In turn nonparametric techniques based on Parzen kernels and orthogonal series are employed to address concept drift in the problem of non stationary regressions and classification in a time varying environment Lastly an extremely challenging problem that involves designing ensembles and automatically choosing their sizes is described and solved Given its scope the book is intended for a professional audience of researchers and practitioners who deal with stream data e g in telecommunication banking and sensor networks

Conceptual Modeling

- ER 2004 Paolo Atzeni, Wesley Chu, Hongjun Lu, Shuigeng Zhou, Tok Wang Ling, 2005-01-17 On behalf of the Organizing Committee we would like to welcome you to the proceedings of the 23rd International Conference on Conceptual Modeling ER 2004 This conference provided an international forum for technical discussion on conceptual modeling of information systems among researchers developers and users This was the third time that this conference was held in Asia the first time was in Singapore in 1998 and the second time was in Yokohama Japan in 2001 China is the third largest nation with the largest population in the world Shanghai the largest city in China and a great metropolis famous in Asia and throughout the world is therefore a most appropriate location to host this conference This volume contains papers selected for presentation and includes the two keynote talks by Prof Hector Garcia Molina and Prof Gerhard Weikum and an invited talk by Dr Xiao Ji This volume also contains industrial papers and demo poster papers An additional volume contains papers from 6 workshops The conference also featured three tutorials 1 Web Change Management and Delta Mining Opportunities and Solutions by Sanjay Madria 2 A Survey of Data Quality Issues in Cooperative Information Systems by Carlo Batini and 3 Visual SQL An ER Based Introduction to Database Programming by Bernhard Thalheim Soft Computing and Signal Processing V. Sivakumar Reddy, V. Kamakshi Prasad, Jiachun Wang, K. T. V. Reddy, 2021-05-20 This book presents selected research papers on current developments in the fields of soft computing and signal processing from the Third International Conference on Soft Computing and Signal Processing ICSCSP 2020 The book covers topics such as soft sets rough sets fuzzy logic neural networks genetic algorithms and machine learning and discusses various aspects of these topics e g technological considerations product implementation and application issues **Proceedings of 2022 Chinese Intelligent Systems Conference** Yingmin Jia, Weicun Zhang, Yongling Fu, Shoujun Zhao, 2022-09-26 This book constitutes the proceedings of the 18th Chinese Intelligent Systems Conference CISC 2022 which was held during October 15 16 2022 in Beijing China The papers in these proceedings deal with various topics in the field of intelligent systems and control such as multi agent systems complex networks intelligent robots complex system theory and swarm behavior event triggered control and data driven control robust and adaptive control big data and brain science process control intelligent sensor and detection technology deep learning and learning control guidance navigation and control of aerial vehicles **Machine Learning and Knowledge Discovery in Databases** Annalisa Appice, Pedro Pereira Rodrigues, Vítor Santos Costa, Carlos Soares, João Gama, Alípio Jorge, 2015-08-28 The three volume set LNAI 9284 9285 and 9286 constitutes the refereed proceedings of the European Conference on Machine Learning and Knowledge Discovery in Databases ECML PKDD 2015 held in Porto Portugal in September 2015 The 131 papers presented in these proceedings were carefully reviewed and selected from a total of 483 submissions These include 89 research papers 11 industrial papers 14 nectar papers and 17 demo papers They were organized in topical sections named classification regression and supervised learning clustering and unsupervised learning data preprocessing data streams and online learning deep learning distance and metric learning large scale learning and big

data matrix and tensor analysis pattern and sequence mining preference learning and label ranking probabilistic statistical and graphical approaches rich data and social and graphs Part III is structured in industrial track nectar track and demo track

Machine Learning: ECML-95 Nada Lavrač,1995-04-05 This volume constitutes the proceedings of the Eighth European Conference on Machine Learning ECML 95 held in Heraclion Crete in April 1995 Besides four invited papers the volume presents revised versions of 14 long papers and 26 short papers selected from a total of 104 submissions The papers address all current aspects in the area of machine learning also logic programming planning reasoning and algorithmic issues are touched upon

Introduction to Machine Learning in the Cloud with Python Pramod Gupta,Naresh K. Sehgal,2021-04-28 This book provides an introduction to machine learning and cloud computing both from a conceptual level along with their usage with underlying infrastructure The authors emphasize fundamentals and best practices for using AI and ML in a dynamic infrastructure with cloud computing and high security preparing readers to select and make use of appropriate techniques Important topics are demonstrated using real applications and case studies

Comprehensive Chemometrics ,2009-03-09 Designed to serve as the first point of reference on the subject Comprehensive Chemometrics presents an integrated summary of the present state of chemical and biochemical data analysis and manipulation The work covers all major areas ranging from statistics to data acquisition analysis and applications This major reference work provides broad ranging validated summaries of the major topics in chemometrics with chapter introductions and advanced reviews for each area The level of material is appropriate for graduate students as well as active researchers seeking a ready reference on obtaining and analyzing scientific data Features the contributions of leading experts from 21 countries under the guidance of the Editors in Chief and a team of specialist Section Editors L Buydens D Coomans P Van Espen A De Juan J H Kalivas B K Lavine R Leardi R Phan Tan Luu L A Sarabia

and J Trygg Examines the merits and limitations of each technique through practical examples and extensive visuals 368 tables and more than 1 300 illustrations 750 in full color Integrates coverage of chemical and biological methods allowing readers to consider and test a range of techniques Consists of 2 200 pages and more than 90 review articles making it the most comprehensive work of its kind Offers print and online purchase options the latter of which delivers flexibility accessibility and usability through the search tools and other productivity enhancing features of ScienceDirect

Intelligent Data Engineering and Automated Learning - IDEAL 2005 Marcus Gallagher,James Hogan,Frederic Maire,2005-06-20 This volume in the Lecture Notes in Computer Science series contains accepted papers presented at IDEAL 2005 held in Brisbane Australia during July 6 8 2005 Generative AI in Neurodegenerative Disorders Anindya Nag,Md. Mehedi Hassan,Asif Karim,Kishor Kumar Reddy C,2025-10-14 This book delves into the transformative power of AI in the realm of neurodegenerative diseases covering topics such as ALS Huntington s Parkinson s and Alzheimer s Generative AI provides new opportunities for early diagnosis precise therapy and individualized rehabilitation which are crucial as these conditions remain major obstacles for healthcare providers and researchers Researchers physicians AI developers and healthcare professionals will find this book an invaluable resource for understanding how AI is influencing the development of treatments for neurodegenerative diseases It describes important obstacles and future directions while providing insights into the newest breakthroughs thus bridging the gap between technology and practical clinical applications Anyone involved in neurodegenerative healthcare from scientists conducting AI driven medical research to physicians seeking to incorporate AI into patient care or AI professionals investigating new healthcare applications will find the information and insights they need in this comprehensive book Predictive analytics biomarker identification and drug discovery are being transformed by AI driven models such as deep neural networks generative adversarial networks GANs and variational autoencoders VAEs This book offers a comprehensive examination of these developments Robots wearable sensors and cognitive therapy platforms are some of the AI enhanced rehabilitation tools covered as are AI integrated cutting edge technologies like fMRI and MRI gene editing methods like CRISPR and more In addition to discussing recent technical developments this book takes a close look at the data privacy ethics and regulatory issues that arise when using AI to study neurodegenerative disorders Issues like algorithmic bias model explainability and fair AI driven healthcare are thoroughly investigated in light of the growing usage of AI models in clinical decision making mental health applications and cognitive rehabilitation **Web Services: Concepts, Methodologies, Tools, and Applications** Management Association, Information Resources,2018-12-07 Web service technologies are redefining the way that large and small companies are doing business and exchanging information Due to the critical need for furthering automation engagement and efficiency systems and workflows are becoming increasingly more web based Web Services Concepts Methodologies Tools and Applications is an innovative reference source that examines relevant theoretical frameworks current practice guidelines industry standards

and standardization and the latest empirical research findings in web services Highlighting a range of topics such as cloud computing quality of service and semantic web this multi volume book is designed for computer engineers IT specialists software designers professionals researchers and upper level students interested in web services architecture frameworks and security

Modern Business Process Automation Arthur H. M. ter Hofstede, Wil M. P. van der Aalst, Michael Adams, Nick Russell, 2009-11-18 The field of Business Process Management BPM is marred by a seemingly endless sequence of proposed industry standards Contrary to other fields e.g. civil or electronic engineering these standards are not the result of a widely supported consolidation of well understood and well established concepts and practices In the BPM domain it is frequently the case that BPM vendors opportunistically become involved in the creation of proposed standards to exert or maintain their influence and interests in the field Despite the initial fervor associated with such standardization activities it is no less frequent that vendors either choose to drop their support for standards that they earlier championed on an opportunistic basis or elect only to partially support them in their commercial offerings Moreover the results of the standardization processes themselves are a concern BPM standards tend to deal with complex concepts yet they are never properly defined and all too often not informed by established research The result is a plethora of languages and tools with no consensus on concepts and their implementation They also fail to provide clear direction in the way in which BPM standards should evolve One can also observe a dichotomy between the business side of BPM and its technical side While it is clear that the application of BPM will fail if not placed in a proper business context it is equally clear that its application will go nowhere if it remains merely a motivational exercise with schemas of business processes hanging on the wall gathering dust

Systems Engineering and Artificial Intelligence William F. Lawless, Ranjeev Mittu, Donald A. Sofge, Thomas Shortell, Thomas A. McDermott, 2021-11-02 This book provides a broad overview of the benefits from a Systems Engineering design philosophy in architecting complex systems composed of artificial intelligence AI machine learning ML and humans situated in chaotic environments The major topics include emergence verification and validation of systems using AI ML and human systems integration to develop robust and effective human machine teams where the machines may have varying degrees of autonomy due to the sophistication of their embedded AI ML The chapters not only describe what has been learned but also raise questions that must be answered to further advance the general Science of Autonomy The science of how humans and machines operate as a team requires insights from among others disciplines such as the social sciences national and international jurisprudence ethics and policy and sociology and psychology The social sciences inform how context is constructed how trust is affected when humans and machines depend upon each other and how human machine teams need a shared language of explanation National and international jurisprudence determine legal responsibilities of non trivial human machine failures ethical standards shape global policy and sociology provides a basis for understanding team norms across cultures Insights from psychology may help us to understand the negative impact on humans if AI ML based machines begin to outperform their

human teammates and consequently diminish their value or importance This book invites professionals and the curious alike to witness a new frontier open as the Science of Autonomy emerges Signal Processing, Telecommunication & Embedded Systems: AI and ML Applications Vikrant Bhateja,Zaid Omar,Anumoy Ghosh,Sarika Shrivastava,2025-11-01 The book discusses the latest developments and outlines future trends in the fields of microelectronics electromagnetics and telecommunication It contains original research works presented at the International Conference on Microelectronics Electromagnetics and Telecommunication ICMEET 2024 organized by Department of Electronics and Communication Engineering National Institute of Technology Mizoram India during 19 20 December 2024 The book is divided into four volumes and it covers papers written by scientists research scholars and practitioners from leading universities engineering colleges and R D institutes from all over the world and shares the latest breakthroughs in and promising solutions to the most important issues facing today s society *Proceedings of the Third SIAM International Conference on Data Mining* Daniel Barbara,Chandrika Kamath,2003-01-01 The third SIAM International Conference on Data Mining provided an open forum for the presentation discussion and development of innovative algorithms software and theories for data mining applications and data intensive computation This volume includes 21 research papers

Unveiling the Magic of Words: A Overview of "**Split Decision The Hybrid Series 1**"

In some sort of defined by information and interconnectivity, the enchanting power of words has acquired unparalleled significance.
