Hao Wang 1921 1995 was one of the few confidants of the great mathematician and logician Kurt G del A Logical Journey is a continuation of Wang s Reflections on G del and also elaborates on discussions contained in From Mathematics to Philosophy A decade in preparation it contains important and unfamiliar insights into G del s views on a wide range of issues from Platonism and the nature of logic to minds and machines the existence of God and positivism and phenomenology The impact of G del s theorem on twentieth century thought is on par with that of Einstein s theory of relativity Heisenberg s uncertainty principle or Keynesian economics These previously unpublished intimate and informal conversations however bring to light and amplify G del s other major contributions to logic and philosophy They reveal that there is much more in G del s philosophy of mathematics than is commonly believed and more in his philosophy than his philosophy of mathematics Wang writes that it is even possible that his quite informal and loosely structured conversations with me which I am freely using in this book will turn out to be the fullest existing expression of the diverse components of his inadequately articulated general philosophy The first two chapters are devoted to G del s life and mental development In the chapters that follow Wang illustrates the quest for overarching solutions and grand unifications of knowledge and action in G del s written speculations on God and an afterlife He gives the background and a chronological summary of the conversations considers G del s comments on philosophies and philosophers his support of Husserl s phenomenology and his digressions on Kant and Wittgenstein and his attempt to demonstrate the superiority of the mind s power over brains and machines Three chapters are tied together by what Wang perceives to be G del s governing ideal of philosophy an exact theory in which mathematics and Newtonian physics serve as a model for philosophy or metaphysics Finally in an epilog Wang sketches his own approach

to philosophy in contrast to his interpretation of G del s outlook **Lancet-clinic** ,1914 **Journal of the Outdoor Life**
