The Media-Savvy Middle School Classroom

Susan Brooks-Young, 2020-10-19 The Media Savvy Middle School Classroom is a practical guide for teachers of Grades 5-8 who want to help their students achieve mastery of media literacy skills. Today's fake news, alternative facts, and digital manipulations are compromising the critical thinking and well-being of middle-grade learners already going through significant personal changes. This actionable book prepares teachers to help their students become informed consumers of online resources. Spanning correct source use, personal versus expert opinions, deliberate disinformation, social media, and more, these ready-to-use activities can be integrated directly into existing language arts and mathematics lesson plans.

Mathematics Teaching in the Middle School, 1994

Elementary and Middle School Mathematics John A. Van de

Walle, 1998 John A. Van de Walle has written a book that helps readers make sense of mathematics and become confident in their ability to teach mathematics to children K-8. Elementary and Middle School Mathematics consists of 16 chapters reflecting the view that all mathematics can be taught through a problem-solving approach that motivates children and builds their confidence as they learn. This book thoroughly discusses the new standards and clearly develops four key aspects of teaching mathematics: the nature of mathematics as a science of pattern and order; an understanding of how children learn mathematics; a problem-solving view of teaching mathematics; and specific methods for integrating assessment with instruction. Simple yet effective classroom activities are woven throughout the chapters, as well as suggestions for technology and literature.
