1. **Highlight** each time the word **headline** is used in the article.
 2. **Highlight** each time a word begins with **re-** (rebuilding, reorganization, etc.)

- How Headlines Change the Way We Think** by Martha Farnsworth December 17, 2014
1. "Why Headlines Matter" "Misleading Headlines Can Lead You Astray" "How What You Read Affects What You See" "How Bad Headlines Make Bad News" "The Worst Headlines Are Dangerous" "You'll Never Believe How Dangerous an Average Headline Is"
 2. There are a plethora of ways that this piece that I discovered with my own mind, actually, the one that we pulled away for the most important part of this article. My own, experience taught that a headline affects how many people will read a piece, particularly in this age of social media. But, every time I find a headline change the way people read an article and the way they view it. The headline affects the rest of the experience. A headline can tell you what kind of article you're about to read—news, opinion, research, I O'Clock—and it sets the tone that will follow.

Describe the use of **POWERS in paragraph 2**

1. Psychology (Name Day) knows that first steps matter really do matter—what we see, hear, feel, experience in our first steps matter with everything. Colors have meanings in the rest of it. Attached are our concepts. And just as people can change the way they think through their choice of article, so too, can the crafting of the headline either shift the perception of the text that follows. By drawing attention to certain details in an article, a headline can attract and repel knowledge in a certain direction. By the choice of phrasing, a headline invited readers to read a piece as presented in that piece before we all details that coincide with what everyone expects. For instance, the headline of this article is "How Bad Headlines Can Lead You Astray"—is not necessarily as surprising, but it does clearly

Making Pre-Algebra Come Alive Alfred S. Posamentier, 2000-07-21 Activities in Pre Algebra is a set of versatile enrichment exercises that covers a very broad range of mathematical topics and applications from the Moebius strip to the googol Several criteria have been used in developing the activities and in selecting the topics that are included All of them bear heavily and equally on our concerns for curriculum goals and classroom management Each activity is presented as a reproducible student investigation It is followed by guidelines and notes for the teacher Each activity is keyed to the National Council of Teachers of Mathematics NCTM Standards Revised This link to the NCTM standards allows teachers to facilitate linking classroom activities to specific state and school district content standards First and foremost the activities are meant to be motivational As much as possible we

want this book to achieve the goal of being attractive to people who thought they didn't like mathematics To accomplish this it is necessary for the activities to be quite different from what students encounter in their basal texts different in both substance and form This seems especially critical no matter how excellent a basal text is being used nearly every class experiences the blahs Unfortunately this sort of boredom is often well entrenched long before the teacher and perhaps even the students are aware of it Presenting activities on a regular basis gives the variety and change of pace needed to sustain interest in any subject
