Mario F. Triola, 2004 El objetivo de esta novena edición de la obra Estadística de Triola es ofrecer el mejor libro de texto introductorio a la materia. La meta se logra por medio de recursos como un estilo ameno de escritura, el uso de las herramientas tecnológicas más recientes, interesantes ejemplos y ejercicios basados en datos reales y abundantes elementos didácticos. Cada capítulo inicia con un problema e incluye entrevistas realizadas por el autor a hombres y mujeres profesionales que utilizan la estadística en su trabajo cotidiano. Al final de cada capítulo se encuentran un repaso del mismo donde se resumen los conceptos y temas principales, ejercicios de repaso, ejercicios de repaso acumulativo, un problema que requiere de pensamiento crítico y de un elemento de redacción, actividades de cooperación en equipo, proyectos con herramientas tecnológicas los cuales están diseñados para utilizar STATDISK, Minitab, Excel o la calculadora TI 83 Plus y proyectos de Internet. El libro contiene 120 textos al margen que ilustran los usos y abusos de la estadística en aplicaciones reales prácticas e interesantes. Por ejemplo se presentan temas como Precisión del conteo de votos y Elección de miembros en la lotería. Debido a que la gran cantidad de ejemplos y ejercicios cubren una amplia variedad de aplicaciones, este libro es apropiado para estudiantes de una gran diversidad de disciplinas que van de las ciencias sociales hasta las económicas administrativas.

The Teaching and Learning of Social Research Methods Melanie Nind, Daniel Kilburn, Rebekah Luff, 2018-03-08 The importance of the teaching and learning of social research methods is increasingly recognised by research councils and policy bodies as crucial to the drive to increase capacity amongst the research community. The need for greater scholarly engagement with how research methods are taught and learnt is also driven by the realisation that epistemological and methodological developments have not been accompanied by a pedagogical literature or culture. Training initiatives need this pedagogic input if they are to realise the educational aspirations for methodologically skilled and competent researchers able to apply, adapt and reflect on a range of high level research methods and approaches. The contributors to this collection have fully engaged with this need to develop and share pedagogical knowledge in relation to the teaching of research methods. Together they span qualitative, quantitative

and mixed methods a range of disciplinary and national contexts and face to face and blended teaching and learning Through detailed examples the collection addresses how best teaching practices develop in response to distinctive challenges that will resonate with readers in so doing it will inspire and inform their own development This book was originally published as a special issue of the International Journal of Social Research Methodology
