

Are you tired of wimpy sailplanes that handle only gentle launches without folding a wing? Sick of gliders that can fly only in light wind so they can still make it home? Disgusted by models that shatter a wing on every tip strike landing? Are you ready for a tough bird, one that won't embarrass you at contests?

The Great Planes Model Manufacturing Company (PO Box 788; Urbana, Illinois 61801; 217 367-2069) gives us the *Spirit*, a kit that is well within the building capabilities of less experienced hobbyists, but also delivers performance that experienced glider pilots and contest flyers want.

Inside the box

The kit includes all the balsa, plywood, hardwood, and hardware needed to build the basic version. Going beyond the basics, some unexpected parts are provided, including a rib alignment gauge, sticklers, a tow hook, a clear canopy, and molded pilot. Careful wood selection, quality machine cutting, and superb die cutting make really top notch parts. The pre-cut shear webs really fit. Those who feel "lite ply" is not strong enough for glider fuselage sides will be pleased to find the kit contains all balsa fuselage sides, doublers and triplers.

The full size, rolled plans are exceptionally clear, comprehensive, and informative. Builders who aren't familiar with terms such as "stringer" or "shear web" need only study the plans to find and identify these parts.

The comprehensive instruction manual takes the builder through the construction process with 40 pages of detailed text supported by 98 photographs and 14 diagrams. It has three view drawings to help plan a color scheme, "Contest Practice Record" forms, plus sections on trimming and test flying, on the theory and practice of thermal hunting, and on slope soaring.

Get it together

The *Spirit* kit, with its high grade parts, clear plans and outstanding instruction manual is a delight to build. The model is constructed entirely of balsa and plywood using traditional techniques and thick, medium, and thin CyA adhesive for the structure, and epoxy for the rudder and elevator hinges.

The kit provides the builder with options,

An FM Product Review: Great Planes' Spirit

By Dave Garwood

Jack of all soaring tasks, this kit features well-cut wood parts and all-around, good flight performance.

PHOTOGRAPHY: Dave Garwood

including spoilers, one- or two-piece wing, and bolt-on versus rubber band wing mount. Instructions are provided for each option, though not all optional materials are included in the kit. My *Spirit* was built with spoilers set into a one-piece, bolt-on wing.

The fuselage is a long box built up from interlocking balsa sides and doublers with lite ply formers, and the clear instructions make it an easy job to build it straight and strong. Here's a tip: three T-cuts are provided for alternative towhook mounting positions. If you hammer them into the plywood plate at the bottom of the fuselage before the sides are glued in place, you won't risk hitting the fuselage sides with the hammer.

The wings are built up from balsa ribs with

basswood spars incorporating a strong shear web system. Balsa sheeting covers the top leading edge of the inner panels (to add strength), but not on the outer panels (to lighten the tips for quicker turning).

The instruction book made building and sheeting the wing so simple, that for once I didn't resort to slow setting carpenter glue and pins to give more time to get it right.

The fin, rudder, and stabilizer are built up from sticks and die-cut parts. Tapered balsa is provided for the elevator. Local artist Sarah Garwood was kind enough to paint the pilot and cockpit.

Wing covering is Top Flite's MonoKote (now distributed by Great Planes Model Manufacturing Company, PO Box 788, Ur-

The colorful *Spirit* box is an indicator of the high grade balsa and ply parts, the molded cockpit and clear canopy (above left). The triple taper leading edge wing

panels (above right) are built up from balsa ribs and basswood spars, with pre-shaped leading and trailing edges. Spoiler is optional.

Spirit Glider Manual
