Measurement and Evaluation in Human Performance James R. Morrow, Dale P. Mood, Weimo Zhu, Minsoo Kang, 2023
Measurement and Evaluation in Human Performance Sixth Edition With HKPropel Access teaches the fundamentals of collecting and analyzing human performance data by focusing on the concepts of reliability and validity. It features practical applications in kinesiology, physical education, and more. *A History of Sports Coaching in Britain* Dave Day, Tegan Carpenter, 2015-10-08 At the London Olympics in 2012, Team GB achieved a third place finish in the medals table. A key factor in this achievement was the high standard of contemporary British sports coaching. But how has British sports coaching transitioned from the amateur to the professional, and what can the hitherto under-explored history of sports coaching in Britain tell us about both the early history of sport and about contemporary coaching practice? *A History of Sports Coaching in Britain* is the first book to attempt to examine the history of British sports coaching from its amateur roots in the deep nineteenth century to the high performance, high status professional coaching cultures of today. The book draws on original primary source material, including the lost coaching lives of key individuals in British coaching, to trace the development of coaching in Britain. It assesses the continuing impact of the nineteenth century amateur ethos throughout the twentieth century and includes important comparisons with developments in international coaching, particularly in North America and the Eastern Bloc. The book also explores the politicisation of sport and the complicated interplay between politics and coaching practice, and illuminates the origins of the structures, organisations, and philosophies that surround performance sport in Britain today. This book is fascinating reading for anybody with an interest in the history of sport, sports coaching, sports development, or the relationships between sport and wider society. *Sport and the Brain: The Science of Preparing, Enduring and Winning, Part C*, 2018-10-31 *Sport and the Brain: The Science of Preparing, Enduring and Winning, Part C* Volume 240 reflects recent advancements in the understanding of how elite athletes prepare for and perform at peak levels under the demands of competition. Topics discussed in this new release include: The influence of challenge and threat states on affect, perceived exertion, attention, and performance during a competitive sprint cycling task; Prior self-control, exertion, and perceptions of pain and task importance during a physically demanding task; Enhancing cardiac vagal activity in sport psychology; The influence of cardiac vagal activity on peripheral perception, performance under pressure, and much more. Takes a multidisciplinary approach focusing on aspects of psychology, neuroscience, skill learning, talent development, and physiology. Focuses on sports and the brain. Contains the expertise of an international panel of contributors. Adopts the novel approach of having a target article with critical commentaries on the lessons learned from British multiple gold medalists at
