Sport and the Neoliberal University Ryan King-White, 2018-01-25 College students are now regarded as consumers not students and nowhere is the growth and exploitation of the university more obvious than in the realm of college sports where the evidence is in the stadiums built with corporate money and the crowded sporting events sponsored by large conglomerates. The contributors to *Sport and the Neoliberal University* examine how intercollegiate athletics became a contested terrain of public/private interests. They look at college sports from economic, social, legal and cultural perspectives to cut through popular mythologies regarding intercollegiate athletics and to advocate for increased clarity about what is going on at a variety of campuses with regard to athletics. Focusing on current issues including the NCAA Title IX recruitment of high school athletes and the Penn State scandal among others, *Sport and the Neoliberal University* shows the different ways institutions, individuals and corporations are interacting with university athletics in ways that are profoundly shaped by neoliberal ideologies.
