Smart Development for Rural Areas André Torre, Stefano Corsi, Michael Steiner, Frédéric Wallet, Hans Westlund, 2020-10-11 This thought provoking book questions the framework of the Horizon 2020 strategy and the policies of smart development It aims to answer the following question Is there any possibility for a policy of smart development and smart specialization in rural and peri urban areas Based on detailed analytical studies empirical and econometric methods as well as various European case studies several conclusions are drawn Smart development policies are well adapted to the developed or intermediate regions containing at the same time rural and urban areas but do not really function for the more rural or more peripheral regions The development policies of rural areas must be adapted to their particular characteristics to the structure of their economies agriculture small firms as well as in their diversity distant regions intermediate regions rural areas near the urban areas It appears interesting to exploit natural and cultural amenities to develop the multifunctional character of the agriculture to promote territorial innovation under all its forms to favor the synergies between the various uses of land and space and to develop the knowledge on the ecological socioeconomic processes as well as on the mechanisms of territorial governance These results are very important because they question the validity of the H2020 policy and the smart development and smart specialization policies and their applicability to the whole European area and not only for the most urban and rich areas It will be valuable reading for students researchers and policy makers in regional development rural studies spatial planning and economic geography

ECISM 2017 11th European Conference on Information Systems Management, 2017-09-14

Measuring Service Performance Dr Ralf Lisch, 2014-03-28 In service societies the tertiary sector has long become the primary sector in terms of GDP and employment Quality research and testing means better service and success in the service industries demands quality Nonetheless complaints about insufficient inconsistent or bad service abound Quality decides on success and failure Where so much is at stake management decisions call for systematic research and consumers look for relevant results that provide guidance in complex markets Research into quality and customer satisfaction gets to the core of a business However many so called studies hardly meet essential criteria of empirical research and deliver artefacts rather than facts This book puts an end to common misconceptions of quality studies Measuring Service Performance is an appeal for an approach to quality research that meets quality criteria itself It is a compelling argument against widespread but rather dubious dealings with measurement data and statistics Ralf Lisch calls for a reconsideration of

the research process focussing on content instead of method and adding meaning to results Because service excellence deserves research excellence Written in a practical accessible style the book offers practitioners as well as market researchers MBA students and others involved in the service sector a critical analysis and discussion of the essentials of Practical Research for Better Quality Methods and Concepts for Designing and Validating Smart Grid Systems Thomas I. Strasser, Sebastian Rohjans, Graeme M. Burt, 2019-11-20 Energy efficiency and low carbon technologies are key contributors to curtailing the emission of greenhouse gases that continue to cause global warming The efforts to reduce greenhouse gas emissions also strongly affect electrical power systems Renewable sources storage systems and flexible loads provide new system controls but power system operators and utilities have to deal with their fluctuating nature limited storage capabilities and typically higher infrastructure complexity with a growing number of heterogeneous components In addition to the technological change of new components the liberalization of energy markets and new regulatory rules bring contextual change that necessitates the restructuring of the design and operation of future energy systems Sophisticated component design methods intelligent information and communication architectures automation and control concepts new and advanced markets as well as proper standards are necessary in order to manage the higher complexity of such intelligent power systems that form smart grids Due to the considerably higher complexity of such cyber physical energy systems constituting the power system automation protection information and communication technology ICT and system services it is expected that the design and validation of smart grid configurations will play a major role in future technology and system developments However an integrated approach for the design and evaluation of smart grid configurations incorporating these diverse constituent parts remains evasive The currently available validation approaches focus mainly on component oriented methods In order to guarantee a sustainable affordable and secure supply of electricity through the transition to a future smart grid with considerably higher complexity and innovation new design validation and testing methods appropriate for cyber physical systems are required Therefore this book summarizes recent research results and developments related to the design and validation of smart grid systems Story Smart Kendall Haven, 2014-10-14 This one of a kind book reveals the secrets of a story's power to persuade inspire influence and to teach Our brains have been evolutionarily hardwired to think to make sense and to understand in simple but hidden story terms You'll discover the Neural Story Net the Make Sense Mandate Motive Matching and the Story Influence Line and understand how these powerful concepts control listener reader engagement attention and the impact your communications will exert You'll learn that what reaches the conscious mind of your target audience is significantly different from what first reached their eyes and ears and that you can control that internal neural process This easy to use guide is organized into four parts the neuroscience of narrative your story tools how narratives exert influence changing beliefs attitudes values etc and the straightforward process of creating Story Smart stories *The Street Smart MBA* James Mangraviti, Steven Babitsky, 2014-03-01 Business schools have long enticed students

into their MBA programs with the promise that after a short stint spent studying the ins and outs of the business world they will be able to step right into the upper echelons of management or launch a business that soon has them flitting about the world in a private jet Sounds great you say Sign me up Not so fast Sure business school might prove a necessary prerequisite for those aiming to gain employment at a large financial institution land a job with a consultancy or accelerate their journey to managerial superstardom at a Fortune 500 company But for aspiring entrepreneurs and established business owners alike the truth of the matter is this The ability to get a business off the ground and running successfully is not the byproduct of toiling away in a classroom learning esoteric subjects like the economics of competition Rather all it takes to start and run a truly successful business are a few sensible time proven techniques that have been needlessly forgotten in business innovators haste to reinvent the wheel That s why in The Street Smart MBA Steve Babitsky and James J Mangraviti Jr encourage you to ditch class or better yet ditch b school altogether and go back to the business basics with a series of ten simple steps that will do more for your company than the letters M B and A ever will There are no forays into game theory in The Street Smart MBA no parables and no intellectualizing Instead what you will find is a practical easy to understand step by step business strategy guide that encourages you to revive a handful of basic yet essential practices that many business owners have lost sight of such as Building a brand that is so synonymous with quality that you ll be able to maximize your company s profits in no time Turning your company s products and services into profits by finding your company aniche working with deadlines and honoring your company s image above all else Dealing with customer complaints head on so that you can turn gripes into opportunities Doing favors mentoring and sending gifts in order to grow your business network And much more With its emphasis on ten simple yet time honored principles that lead to business success The Street Smart MBA is all the business education that entrepreneurs with great ideas and business owners with the drive to succeed will ever need
