- Performance is measured in time (in seconds), using a stop watch, and the total number of errors, determined by the number of times the participant enters a dead end or fails to stay in the lines
- If the maze has not been completed in 3 minutes, discontinue
- Cutoffs:
  - 61 seconds or longer = fail
  - 60 seconds or less with 2 or more errors = fail
  - 60 seconds or less with 0 or 1 error = passes

## **Snellgrove Practice Maze:**

**Geriatric Practice** Audrey Chun, 2019-10-29 This book serves as a comprehensive reference for the basic principles of caring for older adults directly corresponding to the key competencies for medical student and residents. These competencies are covered in 10 sections each with chapters that target the skills and knowledge necessary for achieving competency. Each of the 45 chapters follows a consistent format for ease of use, beginning with an introduction to the associated competency and concluding with the most salient points for mastery. Chapters also include brief cases to provide context to the clinical reasoning behind the competency, strengthening the core understanding necessary to physicians of the future. Written by expert educators and clinicians in geriatric medicine, *Geriatric Practice* is a key resource for students in geriatric medicine, family and internal medicine specialties, hospice and nursing home training, and all clinicians studying to work with aging patients.

**Geriatrics, An Issue of Primary Care: Clinics in Office Practice** Demetra Antimisiaris, Laura Morton, 2017-08-19 This issue of *Primary Care Clinics in Office Practice*, guest edited by Drs. Antimisiaris and Gopalraj, is devoted to Geriatrics. Articles in this issue include Geriatric Assessment for the Primary Care Provider, Ageism in Medicine, What is Normal Aging, Management of Polypharmacy in the 15 Minute Office Visit, Sexuality in the Older Adult, Alzheimer's Disease and the Future, Evaluating the Older Driver, Diabetes in the Older Adult, Hormone Replacement, The Fountain of Youth, Mental Health in Older Age, Advanced Care Planning in the Office, Pain in the Older Adult, Hyperlipidemia and Hypertension in the Older Adult, and Delirium: Assessment and Prognosis.

**Occupational Therapy with Aging Adults - E-Book** Karen Frank Barney, Margaret Perkinson, 2024-06-21 Get all the information you need to work holistically, creatively, and collaboratively when providing services for older adults with *Karen Frank Barney, Margaret A. Perkinson, and Debbie Laliberte Rudman's Occupational Therapy with Aging Adults, 2nd Edition*. Emphasizing evidence-based, occupation-based practice and a collaborative interdisciplinary approach, this text walks students and practitioners through the full range of gerontological occupational therapy practice, inclusive of working with individual clients to working at systems and societal levels. Over 80 leaders in their respective topical areas contributed to the book's 33 chapters, including the conceptual foundations and principles of gerontological occupational therapy, bio-psychosocial age-related changes, environmental forces shaping occupational participation for older adults, the continuum of health care as well as implications for communities, and the attributes, ethical responsibilities, and roles involved in gerontological occupational therapy. This edition also covers topical OT issues that are crucially important to an aging population, such as diversity and inclusion, disability and aging, sexuality, technology, telehealth, and virtual environments, intergenerational connections, updates on dementia research and caring for someone with dementia, occupational justice, and aging age-inclusive communities. An expanded section on hearing ensures your students are well-versed in every aspect of this key practice area. **UNIQUE** Intraprofessional and interprofessional approach to intervention emphasizes working holistically and collaboratively in serving older adults.

UNIQUE Chapter on the wide range of physiological musculoskeletal and neurological changes among the aging patient population highlights related occupational performance issues Case examples help you learn to apply new information to actual client and community situations Chapter on evidence based practice discusses how to incorporate evidence into clinical or community settings Questions at the end of each chapter can be used for discussion or other learning applications UNIQUE Chapters on nutrition food insecurity and oral health explore related challenges faced by older adults Chapter on ethics provides a deeper understanding of how to address challenging ethical dilemmas

*Cognition, Everyday Function and Driving Performance in Old Age* Katarina Fällman, 2024-10-16 The population of people aged 80 years and older is the fastest growing population in the world Age is the main risk factor for many diseases and to be able to investigate and help old people when they have symptoms or increased difficulties in their everyday lives there is a need of knowledge of normal functions and abilities in this population The main aim of this thesis is to present normative data for established cognitive tests from cognitively healthy old persons and to describe and investigate predictors of everyday function and driving performance in old age The results are based on two projects The Elderly in Linköping Screening Assessment and The Normative Study of Driving Ability in Old Swedes Paper I presents normative data for four established cognitive tests measuring processing speed attention and executive function from participants that were longitudinally tested at 85 90 and 93 years of age There was no clinically important difference in test results due to gender but educational level affected test results at 85 years of age Age related decline was present for most of the examined tests Paper II presents normative data for age 85 90 and 93 years for two tests of naming ability and verbal comprehension and investigate age related changes from 85 to 93 years of age Higher educational level was associated with better test results Naming ability was found to be more sensitive to aging than verbal comprehension Paper III describes difficulties and changes of everyday function between 85 and 90 years of age Difficulties in everyday function increased significantly over the five year period Decline in everyday function was partly shown to be predicted by concurrent decline in processing speed and self rated health Paper IV describes driving characteristics of drivers aged 75 years and older and examines associations between driving performance and results on cognitive tests and driving habits There was a large variation in driving performance among the older drivers and combined results on cognitive tests were found to be a more robust predictors of driving performance than age although age was still a significant predictor
