Water

Water is a substance in liquid form. First, it is a liquid which means it can flow. Water is also a lot of fun to splash in puddles or when you change its state, it can freeze, or steam when it boils. Water is important for life. Every living thing needs water to survive. It is the only substance we can find in all three states. Interestingly, water cannot be compressed. It takes up space that doesn't change. Sometimes it's warm. See in a hot cup of tea. One more fun thing about water is that it can see through it.
