Imposters Chris Collins, Paul M. Postal, 2012-03-16 A study of pronominal agreement with imposters third person DPs. This reporter yours truly my lord Madam that denote the speaker or addressee. Normally a speaker uses a first person singular pronoun in English. I, me, mine, myself to refer to himself or herself. To refer to a single addressee a speaker uses second person pronouns you, yours, yourself. But sometimes third person nonpronominal DPs are used to refer to the speaker for example this reporter yours truly or to the addressee my lord the baroness Madam. Is Madam not feeling well? Chris Collins and Paul Postal refer to these DPs as imposters because their third person exterior hides a first or second person core. In this book they study the interactions of imposters with a range of grammatical phenomena including pronominal agreement, coordinate structures, Principle C phenomena, epithets, fake

indexicals and a property of pronominal agreement they call homogeneity Collins and Postal conclude that traditional ideas about pronominal features person number gender which countenance only agreement with an antecedent or the relation of the pronoun to its referent are much too simple They sketch elements of a more sophisticated view and argue for its relevance and explanatory power in several data realms The fundamental proposal of the book is that a pronoun agrees with what they call a source where its antecedent constitutes only one type of source They argue that the study of imposters and closely related camouflage DPs has far reaching consequences that are inconsistent with many current theories of anaphora
