Between Science and Fiction Hanjo Berressem, Michael Bucher, Uwe Schwagmeier, 2012 The idea that the Earth is hollow has inspired both the world of science and the world of fiction. As a scientific concept, this notion has informed the works of Edmond Halley and Leonhard Euler. As a literary conceit, it can be found in the works of Dante and E. A. Poe in novels by Jules Verne, Arno Schmidt, Thomas Pynchon and Mark Z. Danielewski, and in comics, films and computer games. This collection addresses both the scientific and the aesthetic aspects of the Hollow Earth with essays that range from medieval literature to Afrofuturism. Series n 1 work science medium Vol 5. [The Empire Triumphant](#) Kevin J. Wetmore, Jr., 2017-08-10 George Lucas's first Star Wars trilogy shows the influences of its era. Cold War tension is evident in its theme of rebellion against totalitarianism. Recent entries in the Star Wars saga, *The Phantom Menace* (1999) and *Attack of the Clones* (2002) are much more concerned with evil corporations, terrorists and the corruption of the political process. Each film is influenced by the times in which it was released but also by cultural subtexts and by other films that had direct and indirect effects on Lucas as writer, producer and director. This work focuses on all six Star Wars films. The first topic of this multifaceted examination is how the films use the language of colonialism. The Rebellion, *The Empire* to emphasize the idea of imperialism. Next, the author looks at how Asian influences, including religious undertones from Taoism and Buddhism and the works of Kurosawa and other Asian filmmakers, provide a subtext for much of the action. Next, the discussion turns to the representation of people of color in the Star Wars universe and how other ethnicities are represented, overall particularly through the literalization of the word 'aliens'. These topics of discussion provide for penetrating conclusions about Lucas's films and how they represent race, religion and rebellion. **The Forever All: A Philosophical and Spiritual Guide, 2nd Ed** Guyus Seralius, 2014-05-21 In my pantheistic view, the entire universe is the Supreme Being, an infinite purposeful system of positive and negative forces which has always existed and always will, and each of us is that eternal being of light and darkness. needed balance between the atheists and the theists between the capitalists and the socialists between the Democrats and the Republicans and between the government and the governed I also discuss how neither science nor religion independent of the other can adequately explain the world and how ultimate truth will only arise when the scientific thinkers join forces with the spiritual thinkers I created this book as a philosophical and spiritual guide for all those seeking truth Inside you will find my views on pantheism metaphysics science technology politics and religion along with samples of my artwork 30 illustrations included *The Philosophy of Art: The Question of Definition* Tiziana Andina,2013-06-06 A study of the philosophy of art that addresses the question of definition presented by both continental and analytic thinkers **Kenya Gazette** ,2011-03-11 The Kenya Gazette is an official publication of the government of the Republic of Kenya It contains notices of new legislation notices required to be published by law or policy as well as other announcements that are published for general public information It is published every week usually on Friday with occasional releases of special or supplementary editions within the week
