Strategic Customer Management Nigel F Piercy, Nikala Lane, 2009-03-12 A revolution is taking place in the way companies organize and manage the front end of their organization where it meets its customers. Traditional concepts of sales management, account management and customer service are being overtaken by initiatives like customer business development, the strategic sales organization and strategic customer management. This book aims to provide insights into how this revolution is unfolding and to provide a framework for executives and management students to address the issues involved. The book focuses on the transformation of the traditional sales organization into a strategic force leading the strategic customer management process in companies. Traditionally the area of sales management has mainly been treated as a tactical operational topic in the conventional marketing literature, simply part of the communications mix within the planned marketing programme. However the emergence of major customers as dominant buyers in many sectors as a result of pressures towards consolidation and enhanced scale of operations is changing the way in which sales issues are addressed in supplier organizations. The growth of new forms of buyer seller relationship based on collaboration and partnering has encouraged organizations to reconsider the sales and account management operation as an important source of competitive differentiation in commoditized markets. Increasingly sales is being perceived as a central part of business strategy and attention given to the challenges in better aligning sales processes with strategy. This has many implications for the design of the sales organization and its management strategy which go far beyond the confines of conventional marketing views.

Routledge Handbook of Industry and Development John Weiss, Michael Tribe, 2015-09-16 The Routledge Handbook of Industry and Development is a global overview of industrialisation. Each chapter will provide readers with contemporary insights into this essential aspect of economic development. Industrialisation has been at the forefront of discussion on economic development since the earliest days of development economics. But over the last fifty years the manufacturing sectors of different countries and regions have grown at strikingly different rates. In 1960 developing countries took a very small share of global manufacturing production. Today the position had changed radically with fast growth of manufacturing in many parts of what was originally the developing world particularly in China and the rest of East Asia. On the other hand

countries in Africa and parts of Latin America have been largely left behind by this process of industrialisation This volume aims to illuminate this uneven development and takes stock of the current issues that hinder and support industrialisation in low and middle income economies This Handbook is a collection of chapters on different aspects of industrialisation experience in a range of countries Key themes include the role of manufacturing in growth the nature of structural change at different stages of development the role of manufacturing in employment creation alternative options for trade and industrial policy the key role of technology and technical change and the impact of globalisation and the spread of global value chains and foreign direct investment on prospects for industrialisation Several chapters discuss individual country experiences with examples from India Mexico South Africa and Tanzania as well as an overview of African industrialisation This authoritative Handbook will be a key reference source for those studying or wishing to understand contemporary economic development Offering inspiration and direction for future research this landmark volume will be of crucial importance to all development economics scholars and researchers

21 serves as a provocation for the design community to think about rapid changes in the near future to usher in a better tomorrow. The papers in this book explore these themes and their key focus is design for tomorrow: how are products and their development be addressed for the immediate pressing needs within a connected world? The book will be of interest to researchers, professionals and entrepreneurs working in the areas of industrial design, manufacturing, consumer goods and industrial management who are interested in the new and emerging methods and tools for design of new products, systems and services.

Handbook of Research in International Marketing Subhash C. Jain, David A. Griffith, 2011. The global expansion of business has generated a tremendous interest among scholars, but there remains a strong need for theoretical insights into conducting marketing operations abroad. This thoroughly revised edition addresses this lack in the extant literature. The book consists of insights from leading scholars in international marketing, working not only to advance the theoretical underpinnings of today's most important international marketing issues but also to provide insights for how the field of scholarship and practice of international marketing might develop in the future. The authors, top scholars from around the world, provide useful theoretical insights designed to stimulate contemplation and discussion and to provide guidelines for future research on international marketing. The volume includes coverage of topics in four main areas. Part I looks at global branding while Part II examines issues of marketing strategy on a world stage. Part III offers chapters on cultural issues and the book closes with a more detailed look at marketing at the bottom of the pyramid in Part IV. Scholars and students in marketing and international business will find much of value in this comprehensive volume.

The Handbook highlights the requirement for

Handbook of Climate Change and India Navroz Dubash, 2012-03-15. How do policymakers, businesses and civil society in India approach the challenge of climate change? What do they believe global climate negotiations will achieve and how? And how are Indian political and policy debates internalizing climate change? Relatively little is known globally about internal climate debate in emerging industrializing countries, but what happens in rapidly growing economies like India's will increasingly shape global climate change outcomes. This Handbook brings together prominent voices from India, including policymakers, politicians, business leaders, civil society activists and academics, to build a composite picture of contemporary Indian climate politics and policy. One section lays out the range of positions and substantive issues that shape Indian views on global climate negotiations. Another delves into national politics around climate change. A third looks at how climate change is beginning to be internalized in sectoral policy discussions over energy, urbanization, water and forests. The volume is introduced by an essay that lays out the critical issues shaping climate politics in India and its implications for global politics. The papers show that within India climate change is approached primarily as a developmental challenge and is marked by efforts to explore

how multiple objectives of development equity and climate mitigation can simultaneously be met In addition Indian perspectives on climate negotiations are in a state of flux Considerations of equity across countries and a focus on the primary responsibility for action of wealthy countries continue to be central but there are growing voices of concern on the impacts of climate change on India How domestic debates over climate governance are resolved in the coming years and the evolution of India s global negotiation stance are likely to be important inputs toward creating shared understandings across countries in the years ahead and identify ways forward This volume on the Indian experience with climate change and development is a valuable contribution to both purposes
