Formal Ontology in Information Systems P. Garbacz, O. Kutz, 2014-09-05 Formal Ontology in Information Systems FOIS is the flagship conference of the International Association for Ontology and its Applications IAOA. Its interdisciplinary research focus lies at the intersection of philosophical ontology, linguistics, logic, cognitive science, and computer science, as well as in the applications of ontological analysis to conceptual modeling, knowledge engineering, knowledge management, information systems development, library and information science, scientific research, and semantic technologies in general. As in previous years, FOIS 2014 was a nexus of interdisciplinary research and communication. The current proceedings is divided into four main sections dealing with foundations, processes, agency, and dispositions, methods and tools, and applications. The last of these covers a broad spectrum of areas including, in particular, biology and medicine, engineering, and economy. For the first time in its history, the conference hosted a special track, an ontology competition, the aim of which was to encourage authors to make their ontologies publicly available and to allow them to be evaluated according to a set of predetermined criteria. Papers discussing these ontologies can also be found in this volume. The book will be of interest to all those whose work involves the application of ontologies and who are looking for a current overview of developments in formal ontology.

Thematic-Pattern-Based “Concept + Language Mapping” (CLM) Peichang He, 2025-05-19 This book explores the issue of integration in content and language integrated learning (CLIL) and addresses the need for effective content and language integration by proposing the thematic pattern-based Concept Language Mapping (CLM) approach. Peichang He explores effective integration of content and language learning during the instruction of content subjects using students' additional language as the medium of instruction. The volume introduces the contextual background of a large-scale school-university collaboration CLIL research project and builds the conceptual framework of a thematic pattern-based CLM pedagogy by drawing on the language-based theory of learning (Halliday 1993), the construct of thematic patterns (Lemke 1990), and the recent development of genre-based pedagogy (Lin 2016). Rose Lemke Lin 2019 and proposes a transdisciplinary plurilingual thematic pattern-based CLM approach. The book concludes with a discussion on some promising future research orientations, including a transdisciplinary plurilingual thematic pattern-based CLM approach for CLIL sustainability, catering for learner diversity in CLIL, and teacher professional development in thematic pattern-based CLM practice. The book shows readers the design of CLM materials and activities which are demonstrated through classroom interactions in lessons of different subjects and grades for students of diverse cognitive abilities and linguistic backgrounds. This insightful volume will be of interest to researchers and trainee teachers exploring pedagogical approaches to CLIL, plurilingual, and transdisciplinary education and will provide pedagogical implications for teachers of both language and

content subjects in schools worldwide **Scientific American** ,1896
