Systems: Theory and Practice Amit Kumar Tyagi, Niladhuri Sreenath, 2022-11-25 This book provides fundamental principles of intelligent transport systems with comprehensive insight and state of the art of vehicles vehicular technology connecting vehicles and intelligent vehicles autonomous intelligent vehicles The book discusses different approaches for multiple sensor based multiple objects tracking in addition to blockchain based solutions for building tamper proof sensing devices It introduces various algorithms for security privacy and trust for intelligent vehicles This book countermeasures all the drawbacks and provides useful information to students researchers and scientific communities It contains chapters from national and international experts and will be essential for researchers and advanced students from academia and industry experts who are working on intelligent transportation systems *Smart Strategies for Buying a Car* Daniel E. Harmon, 2014-07-15 Most young drivers have one goal in mind when they think of getting their own vehicle freedom Car ownership is one of life's joys as well as one of its major financial investments This candid volume offers readers a step by step approach for how to choose the best car to suit their needs and how best to plan research and budget for the purchase In today's economically challenging times students require an opportunity to learn about money management as well as car facts the choices available and the importance of safety Content supports state and national standards on financial literacy *The Engineering Handbook of Smart Technology for Aging, Disability, and Independence* Abdelsalam Helal, Mounir Mokhtari, Bessam Abdulrazak, 2008-08-20 An advanced look at smart technology to promote the independence of the elderly and disabled Ongoing research and advancements in technology are essential for the continuing independence of elderly and disabled persons The Engineering Handbook of Smart Technology for Aging Disability and Independence provides a thorough analysis of these technologies and the needs of the elderly and disabled including a breakdown of demographics government spending growth rate and much more Each chapter is written by an expert in his or her respective field and gives readers unparalleled insight into the research and developments in a multitude of important areas including User need analyses classifications and policies Assistive devices and systems for people with motor disabilities Assistive devices and systems for people with visual and hearing impairments Human machine interaction and virtual reality Assistive robotics Technology for user mobility and object manipulation Smart homes as assistant environments A discussion of emerging standards and guidelines to build accessible devices tools and environments This book is an indispensable resource for researchers and professionals in computer science rehabilitation science and clinical engineering It also serves as a valuable textbook for graduate students in the aforementioned fields **Inevitability of AI Technology in Education** Yoav Armony, Orit Hazzan, 2024-09-18 This book layouts historic and future perspectives at the introduction of technology into education systems On the one hand the book attempts to explain why despite numerous attempts technology has struggled to integrate successfully into the education system for over a century on the other hand it explores whether this trend will persist in the foreseeable future questioning if emerging technologies like virtual reality or Gen AI will ever be embraced by education

systems worldwide and introducing a hypothesis that these technologies will become inevitable so that education systems will have a little choice in adopting them The underlying perspective is that education systems need to prepare for this new future and better start doing so now The book encompasses three key areas education technology and future studies with a focus on how technology will shape the future of education It begins by examining past failures of integrating technology into education analyzing the reasons behind these setbacks It progresses to assess the potential integration of future technologies 10 20 years from now exploring a feasible scenario and the force implications on learning teachers and the system Examining recent attempts to implement technology in education reveals numerous reasons for failure A significant contributing factor appears to be inherent conflicts within the education system s fundamental structure These conflicts involving goals curricula organizational structure pedagogy and student management prevent the system from embracing reforms or new technologies Envisioning a future where technology will deeply know the students sense their environment understand the context and the situation explain and advise them on the best suitable behavior or activity the book anticipates applications in education ranging from ensuring personal safety and health to enhancing knowledge acquisition and decision making As the book explores the potential inevitability of technology in education it recognizes the transformative impact on teachers and students and outlines possible desire scenario to aid in preparation such as personalized education to better suit student s capabilities needs and desires how to motivate students to learn in an environment where all tasks can be done by machines ethical issues the new role of the school the educator and the system etc This book is especially suitable for teachers educators public officials and anyone interested in the future of education
