Rajak,Parveen Kumar,Sarita Rathee,2024-08-14 This book presents an analysis of the existing surveys in the literature of batteries chargers control systems battery management systems plugs sockets drives and fuel cell based and plug in smart electric and hybrid vehicles It provides detailed comparative analysis of parameters of intelligent electric and hybrid vehicles with conventional vehicles and in depth knowledge of power electronics tools in smart electric and hybrid vehicles This book compiles the research work and findings in advancements of smart electric and hybrid vehicles from automobile mechanical electronic electrical computer science and allied engineering domains and explains how smart electric and hybrid vehicles can be utilized without harmful emissions over the entire lifecycle of a vehicle and how reliance on fossil fuels can be reduced Features Discusses different types of lightweight and robust materials for the fabrication of smart electric and hybrid vehicles Presents computational models emerging technologies numerical techniques and environmental and economic benefits applicable to electric vehicles Highlights the applications of smart and hybrid vehicles in diverse sectors including aerospace agriculture defense and medical Covers electromechanical drives storage systems wireless charging and component design for smart electric and hybrid vehicles Showcases a detailed comparative analysis of parameters of intelligent electric and hybrid vehicles with conventional vehicles It is primarily written for senior undergraduates graduate students and academic researchers in the fields of electrical engineering electrical and electronics engineering computer engineering and automotive engineering

An Integrated Formal Task Specification Method for Smart Environments Maik Wurdel,2011 This thesis is concerned with the development of interactive systems for smart environments One of the characteristic of smart environments is the need to support different interaction paradigms at runtime On the one hand interaction is performed explicitly the user performs an action in order to interact with the system e g pressing a button to adjust the light On the other hand actions of the user are interpreted by the smart environment even though they have not been performed primarily to interact with the system implicit interactions e g walking to the speaker s desk to give a talk A smart environment tries to infer those interactions to assist the user in her work e g display slides at the projection canvas Both interaction paradigms originate from different research fields and are currently treated independently although implicit and explicit interaction mutually influence each other and occur interleaved The thesis introduces a task modeling language in order to cope with the given requirements of smart environments which can be used to perform interaction development for smart environments in a model based fashion for both interaction paradigms

Vehicular Communications for Smart Cars Niaz Chowdhury,Lewis Mackenzie,2021-12-30 This book covers a wide range of topics from the smart transportation domain It discusses protocols applications and security concerns in various vehicular networks using examples and easy to understand figures The first four chapters focus on vehicular network protocols and applications while the remaining four chapters incorporate security trust and privacy issues with examples from real life cases The book concludes with a vision of what to expect in the near future and will be an invaluable resource for anybody interested in this

nascent technology and its variegated applications Dr Niaz Chowdhury is a postdoctoral research associate at the Knowledge Media Institute the Open University in England Dr Lewis M Mackenzie is a senior lecturer in computing science at the University of Glasgow

Dare to be Different Narendar V. Rao,D. Vasudeva Rao,2023-09-26 The genesis of this book was a series of discussions between the two authors stretching over an extended period These discussions resulted in the desire to write a book blending practical industry experience with contemporary management thought It is designed to serve as a helpful handbook for managers containing insights on various management and corporate strategy topics The overall theme of the book is value creation So the topics covered in this book are interconnected by the underlying theme of value creation However the subjects are standalone so the reader can go directly to the topic of interest instead of reading the entire book There is a great transition that is currently underway in the global business environment Managers must grapple with several challenges including rapid technological changes and fierce competition In addition companies face resource constraints and the risk of being pushed aside by nimble agile competitors who are determined to disrupt traditional business models The authors hope that the practical knowledge in this book will help managers successfully cope with the vicissitudes of the unpredictable rapidly evolving global business environment and enable them to successfully steer their company through the turbulent times toward enduring value creation In summary the insights in this book will guide managers at companies that Dare to be Different

Applications of Computational Learning and IoT in Smart Road Transportation System Saurav Mallik, Hong Qin, Subrata Nandi, Munshi Yusuf Alam, Arup Roy, Tanvir Habib Sardar, 2025-05-08 This book discusses machine learning and AI in real time image processing for road transportation and traffic management There is a growing need for affordable solutions that make use of cutting edge technology like artificial intelligence AI machine learning ML and the Internet of Things IoT The efficiency sustainability and safety of transport networks can be greatly increased by implementing an Internet of Things IoT and machine learning ML based smart road transport system Install sensors on roadways and intersections to gather data on traffic conditions in real time such as vehicle density speed and flow Predicting traffic patterns is done by analyzing the gathered data using machine learning algorithms This can lessen traffic enhance overall traffic management and optimize traffic signal timings Vehicles equipped with Internet of Things devices can have their health monitored in real time

Parameters including lane changes brake condition tire pressure and engine performance can all be monitored by sensors Based on the gathered data ML models are used to forecast probable maintenance problems By scheduling preventive maintenance failures can be avoided and overall road safety can be increased Create a smartphone app that would enable drivers to locate parking spots in their area To forecast parking availability based on past data the time of day and special events apply machine learning algorithms Integrate Internet of Things IoT sensors into fleet vehicles to monitor their performance location and fuel consumption To maximize fleet efficiency reduce fuel consumption and plan routes more effectively apply machine learning algorithms Train ML models to forecast the quickest and most efficient routes with the help of historical data analysis Route recommendations for drivers or fleet management systems can be constantly adjusted with real time updates which contain real time data on road conditions accidents and construction To guarantee smooth integration and efficient implementation government organizations transportation providers and technology firms must work together
